since its publication in 1996 many thousands of students have first encountered key issues in the philosophy of mind in the pages of rocco j gennaro s introductory work mind and brain a dialogue on the mind body problem in this new edition gennaro updates and expands the work to reflect current topics and discussions the dialogue provides a clear

and compelling overview of the mind body problem suitable for both introductory students and those who have some background in the philosophy of mind topics include immortality materialism descartes divisibility argument for substance dualism the argument from introspection for substance dualism the main objections to dualism the interaction between mind and brain the relation between brain damage and the prospect of an afterlife parallelism and epiphenomenalism the type token distinction within materialism and the problem of multiple realizability arguments against materialism and its ability to explain consciousness property dualism and panpsychism the epistemological problem of other minds the nature of inductive knowledge evidence for animal consciousness the problem of machine or robot mind the inverted spectrum argument also included are a brief introduction a list of study questions designed to enhance classroom discussion and serve as a resource for the development of paper topics a glossary and an index of key terms

stimulating introduction to the most central and interesting issues in the philosophy of mind topics covered include dualism versus the various forms of materialism personal identity and survival and the problem of other minds

the oxford handbook of philosophy of religion contains newly commissioned chapters by 21 prominent experts who cover the field in a comprehensive but accessible manner each chapter is expository critical and representative of a distinctive viewpoint

in this lively introduction to the philosophy of mind important questions are tackled with clear explanations of all the theories of mind from the classic accounts of descartes and aquinas to the developments in computing and cognitive science

the modal ontological argument anselm s understanding of conceivability anselm s understanding of possibility the proslogion iii argument arguments in the reply to gaunilo anselm s other argument an assessment of the argument

this book presents a strong case for substance dualism and offers a comprehensive defense of the knowledge argument showing that materialism cannot accommodate or explain the hard problem of consciousness bringing together the discussion of reductionism and semantic vagueness in an original and illuminating way howard robinson argues that non fundamental levels of ontology are best treated by a conceptualist account rather than a realist one in addition to discussing the standard versions of physicalism he examines physicalist theories such as those of

McDowell and Price and accounts of neutral monism and panpsychism from Strawson, McGinn, and Stoljar. He also explores previously unnoticed historical parallels between Frege and Aristotle and between Hume and Plotinus. His book will be a valuable resource for scholars and advanced students of philosophy of mind, in particular those looking at consciousness dualism and the mind-body problem.

R. G. Collingwood is an important 20th-century historian, archaeologist, and philosopher whose works are the subject of continued interest. Analysis and study of his work show an unquestionable need to support this research activity with the provision of a reference guide which is fully up to date, informed, and authoritative. The companion therefore lists all primary and secondary material relevant to the study of Collingwood in all his fields of expertise: historical theory, philosophy, and archaeology. It also provides a guide to archive material relevant to his life, together with sources and locations. The resulting volume is an essential companion to the understanding of the life and thought of R. G. Collingwood.

It takes the view that the dominant scientific materialist outlook has an incredibly narrow basis and ignores the most important aspects of human experience.
