this text is the result of a short course on the galois structure of s units that was given at the fields institute in the autumn of 1993 offering a new angle on an old problem the main theme is that this structure should be determined by class field theory in its cohomological form and by the behaviour of artin L functions at $s = 0$ a proof of this or even a precise formulation is still far away but the available evidence all points in this direction the work brings together the current evidence that the galois structure of s units can be described this is intended for graduate students and research mathematicians specifically algebraic number theorists
