the origins of the philosophy of symbolic forms marks the culmination of donald phillip verene s work on ernst cassirer and heralds a major step forward in the critical work on the twentieth century philosopher verene argues that cassirer s philosophy of symbolic forms cannot be understood apart from a dialectic between the kantian and hegelian philosophy that lies within it verene takes as his departure point that cassirer never wishes to argue kant over hegel instead he takes from each what he needs realizing that philosophical idealism itself did not stop with kant but developed to hegel and that much of what remains problematic in kantian philosophy finds particular solutions in hegel s philosophy cassirer never replaces transcendental reflection with dialectical speculation but he does transfer dialectic from a logic of illusion that is the form of thinking beyond experience as kant conceives it in the critique of pure reason to a logic of consciousness as hegel employs it in the phenomenology of spirit cassirer rejects kant s thing in itself but he also rejects hegel s absolute as well as hegel s conception of aufhebung kant and hegel remain the two main characters on his stage but they are accompanied by a large

secondary cast with goethe in the foreground cassirer not only contributes to goethe scholarship but in goethe he finds crucial language to communicate his assertions verene introduces us to the originality of cassirer s philosophy so that we may find access to the riches it contains

vico's term that reality is the monde civile the world of man it is a world of many guises and faces if reflected in a mirror those faces would reveal an image of the full array of contemporary arts and sciences all the disciplines of learning and technique by which so vico judged humanity attains its perfection humanity in its perfection however is so rare a moment so delicate and subtle a state that it is never to be found among the nations of the world or is found in so fragile a form that it threatens always to crack and fall to the ground in the west a persistent line of thinking that has flourished from time to time holds that language is primary in culture metaphor a necessity and jurisprudence our highest achievement this was the position of vico who not only received and cherished the tradition but looked deeply into it saw what its principles implied and so made ready for the great social theorists of the nineteenth century that is the thesis of this work after an introductory chapter on vico himself in which his intellectual world and his movements within it are sketched the work unfolds in three parts these parts successively treat rhetoric pedagogy and culture each proceeding from a major vichian text
