there have been several attempts to write the history of britain s chemical industry as a whole and countless others concentrating on individual companies some have looked at the technical aspects of the industry whilst others have addressed economic issues few have however attempted to analyse the effects of the chemical industry on society in general the current environmental crisis can only be fully understood in the light of its history this is the first such book to look critically at the whole development of industrial chemistry in the uk in the context of its effects on the environment no one from industry government or academia can afford to be unaware of the historical roots of our present dilemma industrial chemists can take heart from the realization

that their predecessors were remarkably aware of the problems and often found satisfactory solutions industrial chemistry has traditionally been seen as the great polluter without any attempts at whitewash this book puts the record straight from academic chemist to industrialist to politician chemistry society and environment a new history of the british chemical industry will be of relevance to all those concerned with the social and environmental impact of the chemical industry

this volume provides an introduction to medicinal chemistry it covers basic principles and background and describes the general tactics and strategies involved in developing an effective drug

a collection of the nobel lectures delivered by the prizewinners in chemistry together with their biographies portraits and the presentation speeches
