discusses the cambrian era in earth's history when the first forms of life appeared and began to flourish and evolve

published in 1931 for non specialist readers this engaging book explains what plant fossils can tell us about prehistoric times

a comprehensive guide to the evolution of life during the cambrian period and a story of one man's search for the world's oldest animal fossils told with a wry humor the odd pop cultural sci fi reference and personal anecdotes foster does a great job in making this an enjoyable read and bringing the cambrian to us an alien world is transformed before our eyes into one that is increasingly more familiar quarterly review of biology this volume aimed at the general reader presents the life and times of the amazing animals that inhabited earth more than five hundred million years ago the cambrian period was a critical time in earth's history during this immense span of time

nearly every modern group of animals appeared although life had been around for more than two million millennia cambrian rocks preserve the record of the first appearance of complex animals with eyes protective skeletons antennae and complex ecologies grazing predation and multi tiered ecosystems with animals living in on or above the sea floor became common the cascade of interaction led to an ever increasing diversification of animal body types by the end of the period the ancestors of sponges corals jellyfish worms mollusks brachiopods arthropods echinoderms and vertebrates were all in place the evidence of this cambrian explosion is preserved in rocks all over the world including north america where the seemingly strange animals of the period are preserved in exquisite detail in deposits such as the burgess shale in british columbia cambrian ocean world tells the story of what is for us the most important period in our planet s long history definitely the best introductory textbook within its field it is clearly worth reading deposits magazine

a comprehensive introduction to the epic geological history of the world s rivers from the first drop of rain on the earth to the modern environmental crisis

this book places the present creationist opposition to the theory of evolution in historical context by setting out the ways in which from the seventeenth century onwards investigations of the history of the earth and of humanity have challenged the biblical views of chronology and human destiny and the christian responses to these challenges the author s interest is not primarily directed to questions such as the epistemological status of scientific versus religious knowledge or the possibility of a darwinian ethics but rather to the problems and various responses to the problems raised in a particular historical period in the west for the bible by the massive extension of the duration of geological time and human history

published papers whose appeal lies in their subject matter rather than their technical statistical contents medical social educational legal demographic and governmental issues are of particular concern

written specifically for courses that cover biological anthropology and archaeology this superbly illustrated new text offers the most balanced and up to date introduction to our human past devoting equal time to biological anthropology and prehistory this text exposes students to the many sides of major controversial issues involving students in the scientific thought process by allowing them to draw their own conclusions amidst discussions of bones and artifacts the text maintains a focus on people demonstrating to students how biological anthropology and archaeology apply to their lives today featuring the latest research and findings pulled from the original

sources this new text is far and away the most up to date text available in addition the superior art program features hundreds of photographs and figures and the multimedia presentation options include documentary film clips and lecture launcher videos pat rice a recipient of aaa s outstanding teacher award and past president of the general anthropology division of aaa and norah moloney an experienced professor and active archaeologist present the material in a clear refreshing and straightforward writing style

one of vox s most important books of the decade new york times editors choice 2017 forbes top 10 best environment climate and conservation book of 2017 as new groundbreaking research suggests that climate change played a major role in the most extreme catastrophes in the planet s history award winning science journalist peter brannen takes us on a wild ride through the planet s five mass extinctions and in the process offers us a glimpse of our increasingly dangerous future our world has ended five times it has been broiled frozen poison gassed smothered and pelted by asteroids in the ends of the world peter brannen dives into deep time exploring earth s past dead ends and in the process offers us a glimpse of our possible future many scientists now believe that the climate shifts of the twenty first century have analogs in these five extinctions using the visible clues these devastations have left behind in the fossil record the ends of the world takes us inside scenes of the crime from south africa to the new york palisades to tell the story of each extinction brannen examines the fossil record which is rife with creatures like dragonflies the size of sea gulls and guillotine mouthed fish and introduces us to the researchers on the front lines who using the forensic tools of modern science are piecing together what really happened at the crime scenes of the earth s biggest whodunits part road trip part history and part cautionary tale the ends of the world takes us on a tour of the ways that our planet has clawed itself back from the grave and casts our future in a completely new light

discusses in twenty volumes the geography vegetation animal life and resources of various regions throughout the world
