published to coincide with the fourth united nations environmental assembly un environment's sixth global environment outlook calls on decision makers to take bold and urgent action to address pressing environmental issues in order to protect the planet and human health by bringing together hundreds of scientists peer reviewers and collaborating institutions and partners the geo reports build on sound scientific knowledge to provide governments local authorities businesses and individual citizens with the information needed to guide societies to a truly sustainable world by 2050 geo 6 outlines the current state of the environment illustrates possible future environmental trends and analyses the effectiveness of policies this flagship report shows how governments can put us on the path to a truly sustainable future emphasising that urgent and inclusive action is needed to achieve a healthy planet with healthy people this title is also available as open access on cambridge core

solar system planets and exoplanets provides a current viewpoint of planetary systems the solar system's planets and exoplanets are addressed in an overview manner and specific space probe data are used to provide a current state of knowledge of venus and mars recent mars data and associated observations are addressed in several chapters of particular interest are data that suggest the possibility that life could have existed on the planet's surface during its past when mars atmosphere was wetter and denser the search for life on mars is one of the main objectives of space missions and it is an ongoing theme of this book key to the existence of life is the evolution of the radiation output of the sun that is discussed and projected into the future space probe data related to the asteroid belt is also presented technological advances in terms of operating aircraft on mars and propulsion systems provide useful commentary regarding future innovations that will enhance upcoming space missions and the search for life

environmental educators face a formidable challenge when they approach climate change due to the complexity of the science and of the political and cultural contexts in which people live there is a clear consensus among climate scientists that climate change is already occurring as a result of human activities but high levels of climate change awareness and growing levels of concern have not translated into meaningful action communicating climate change provides environmental educators with an understanding of how their audiences engage with climate change information as well as with concrete empirically tested communication tools they can use to enhance their climate change program starting with the basics of climate science and climate change public opinion armstrong krasny and schuldt synthesize research from environmental psychology and climate change communication weaving in examples of environmental education applications throughout this practical book each chapter covers a separate topic from how environmental psychology explains the complex ways in which people interact with climate change information to communication strategies with a focus on framing metaphors and messengers this broad set of topics will aid educators in formulating program language for their classrooms at all levels communicating climate change uses fictional vignettes of climate change education programs and true stories from climate change educators working in the field to illustrate the possibilities of applying research to practice armstrong et al ably demonstrate that environmental education is an important player in fostering positive climate change dialogue and subsequent climate change action thanks to generous funding from cornell university the ebook editions of this book are available as open access from cornell open cornellpress cornell edu cornell open and other open access repositories

this book outlines the development and perspectives of the anthropocene concept by paul j crutzen and his colleagues from its inception to its implications for the sciences humanities society and politics the main text consists primarily of articles from peer reviewed scientific journals and other scholarly sources it comprises selected articles on the anthropocene published by paul j crutzen and a selection of related articles mostly but not exclusively by colleagues with whom he collaborated closely in the year 2000 nobel laureate paul j crutzen proposed the anthropocene concept as a new epoch in earth's history comprehensive collection of articles on the

anthropocene by paul j crutzen and his colleagues unique primary research literature and crutzen s comprehensive bibliography paul crutzen s scientific investigations into human influences on atmospheric chemistry and physics the climate and the earth system leading to the conception of the anthropocene reflections on the anthropocene and its implications bibliometric review of the spread of the use of the anthropocene concept in the natural and social sciences humanities and law

this book builds on the insights of g nther bachmann former secretary general for the german sustainability council who spent almost 20 years advising the german government on sustainability policy the book discusses his experiences in negotiating stakeholder statements at the highest national levels bachmann takes the reader behind the scenes of german sustainable policy and practice whilst also comparing germany with other national approaches he tells the story of political events from his insider perspective unfolding the narrative of sustainable development goals and how activists in their respective countries could and should relate to it furthermore he suggests new lines of vision through the tangle of conference fatigue and buzzwords the book argues that environmentalists often display entrenched attitudes that too often downplay success the rhetoric of crisis and doom if overstretched and reduced to alarm paralyses action and innovation bachmann who on the contrary argues positively and concretely shows unusual but significant signs of hope and confidence in action and how these can be made effective in the politics of sustainable development this book will be of global relevance to sustainability professionals and policy makers and will advise them on how to successfully move ahead with sustainability policies

this book combines elementary theory from computer science with real world challenges in global geodetic observation based on examples from the geodetic observatory wettzell germany it starts with a step by step introduction to developing stable and safe scientific software to run successful software projects the use of software toolboxes is another essential aspect that leads to the application of generative programming an example is a generative network middleware that simplifies communication one of the book s main focuses is on explaining a potential strategy involving autonomous production cells for space geodetic techniques the complete software design of a satellite laser ranging system is taken as an example such automated systems are then combined for global interaction using secure communication tunnels for remote access the network of radio telescopes is used as a reference combined observatories form coordinated multi agent systems and offer solutions for operational aspects of the global geodetic observing system ggos with regard to industry 4 0

with descriptions of more than 12 000 newsletters in 4 000 different subject areas this comprehensive resource is an invaluable research tool

the science of informatics in the broadest sense has been several thousands of years in the making with the recent emergence of large storage devices and high speed processing of data it has become possible to organize vast amounts of data as digital products with ontologic tags and concepts for smart queries coupling this computational capability with earth science data defines the emerging field of geoinformatics since the science of geology was established several centuries ago observations led to conclusions that were integrative in concept and clearly had profound implications for the birth of geology as disciplinary information about earth becomes more voluminous the use of geoinformatics will lead to integrative science based discoveries of new knowledge about planetary systems twenty one research papers co authored by 96 researchers from both earth and computer sciences provide the first ever organized presentation of the science of informatics as it relates to geology readers will readily recognize the vast intellectual content represented by these papers as they seek to address the core research goals of geoinformatics publisher s website

master s thesis from the year 2013 in the subject law miscellaneous grade 1 7 course master of international and european public law language english abstract historically diplomatic immunity arose out from the respect of the messengers who carry the message of their ruler or sovereign to declare war conclude peace or about other important national issues what is the appropriate scope of diplomatic immunity or whether the diplomatic privileges and immunities are too broad and in what parts they should be limited the answer to this question requires the study of the history theory and practice of the diplomatic privileges and immunities the vienna convention is the vital subject of this work because it codified in details the customary law and the diplomatic practices regarding the diplomatic privileges and immunities this work also analyses some cases explaining how the rules regarding the diplomatic privileges and immunities are implementing in practice
