the 16th icsmge responds to the needs of the engineering and construction community promoting dialog and exchange between academia and practice in various aspects of soil mechanics and geotechnical engineering this is reflected in the central theme of the conference geotechnology in harmony with the global environment the proceedings of the conference are of great interest for geo engineers and researchers in soil mechanics and geotechnical engineering volume 1 contains 5 plenary session lectures the terzaghi oration heritage lecture and 3 papers presented in the major project session volumes 2 3 and 4 contain papers with the following topics soil mechanics in general infrastructure and mobility environmental issues of geotechnical engineering enhancing natural disaster reduction systems professional practice and education volume 5 contains the report of practitioner academic forum 20 general reports a summary of the sessions and workshops held during the conference

the deep mixing method dmm is an in situ soil treatment technology whereby the soil is blended with cementitious and or other materials this third report focuses closely on the properties of soils treated by dmm and aspects of quality control quality assurance and verification this report expands on the illustrative details previously provided in volumes i and ii the engineering properties of treated soils as reported in the international technical press are reviewed together with the construction parameters and materials used to treat them sources of information include data from routine production tests special laboratory and field tests and more qualitative statements made in overview

by specialists in the dmm technology methods of process control and verification of performance are also discussed since these are key issues in the minds of current and potential users

the deep mixing method dmm is an in situ soil treatment technology whereby the soil is blended with cementitious and or other materials this report first traces the historical development of the various proprietary dmm methods and provides a structured summary of applications it also compares the applicability of dmm with other competitive forms of ground treatment and improvement the bulk of the report constitutes a description of the individual methods focusing on the equipment the procedures and the properties of the treated soil the report continues by describing the nature of the market in north america japan and scandinavia while observations are also made on the various potential barriers to further growth in the united states this report incorporates some factual data from an earlier federal highway administration draft report 1996 but follows a different structure and philosophy

the atlas describes soil as habitat for the diversity of organisms that live under our feet at the same time it draws attention to the threats to soil biodiversity such as invasive species pollution intensive land use practices or climate change the atlas provides current solutions for a sustainable management of soils it was coordinated by the jrc and the global soil biodiversity initiative globalsoilbiodiversity.org with more than 70 contributing organisations and several hundred individual contributions it illustrates the diversity of soil organisms explains their geographical and temporal distribution the ecosystem functions and services provided by soil biota most importantly it draws attention to the myriad of threats to soil biodiversity these include inappropriate land management practices e g deforestation land take for infrastructure development agricultural systems over grazing forest fires and poor water management both irrigation and drainage other practices such as land conversion from grassland or forest to cropped land result in rapid loss of soil carbon which indirectly enhances global warming the atlas shows that mismanaging soils could exacerbate the effects of climate change jeopardise agricultural production compromise the quality of ground water and worsen pollution it also proposes solutions to safeguard soil biodiversity through the development of policies that directly or indirectly target soil health leading to a more sustainable use
