What Is Financial Accounting? Financial accounting involves recording, summarizing, and reporting a company's financial transactions. Its primary purpose is to provide external stakeholders—such as investors, creditors, regulators, and shareholders—with transparent and reliable financial statements. These statements include:

- Income Statement
- Balance Sheet
- Cash Flow Statement
- Statement of Shareholders' Equity

The focus is on accuracy, consistency, and compliance with accounting standards like GAAP or IFRS.

What Is Managerial Accounting? Managerial accounting, on the other hand, is geared toward internal decision-makers within an organization. It emphasizes providing managers with the financial insights needed to make strategic decisions, improve operational efficiency, and plan for the future. Key topics include:

- Budgeting and Forecasting
- Cost Volume Profit Analysis
- Variance Analysis
- Performance Metrics
- Cost Allocation

Unlike financial accounting, managerial accounting is more flexible and detailed, often tailored to specific organizational needs.
