accounting practice whether in business or government is more dynamic more complex and addresses a wider array of issues than it did as little as five years ago significant and rapid social political technological and economic changes are taking place in the world economy and it is increasingly recognised that accountants in all

countries play a key role in the process of economic development accounting education is undergoing a thorough review on a worldwide basis and major developments are taking place to produce quality accounting education that can keep pace with dramatic world change this book provides an up to date view of the state of accounting education throughout the world and focusses on the global challenges facing accounting education as we approach the millenium

the ruination of investors in enron worldcom waste management aldelphia tyco and scores of other business concerns has raised questions about the adequacy and relevance of academic research into accounting ethics as well as the ethical nature of professional parties this research collection includes important papers from key journals and books that reassess theories research studies and professional practices in the field of accounting ethics in addition to examining the current crisis in the creditability of financial reports many of the papers here work toward developing a body of knowledge that will protect the investing public in the future

much has been written about the economic and political problems of countries that are in the process of changing from centrally planned systems to market systems most studies have focused on the economic legal political and sociological problems these economies have had to face during the transition period however not much has been written about the dramatic changes that have to be made to the accounting and financial system of a transition economy accounting and financial system reform in a transition economy a case study of russia was written to help fill that gap

this edition of research on professional responsibility and ethics in accounting explores many aspects of professional responsibility and ethics in accounting including giving voice to values whistleblowing earnings management and materiality

this book discusses recent developments relating to ethical and sustainable issues in accounting finance accounting is often seen as a technical discipline that records classifies and reports financial transactions however since the financial information produced concerns all interest groups both within and outside the enterprise accounting also has social characteristics and involves multi faceted duties and responsibilities as such in addition to basic principles and accepted rules and standards in the field this book focuses on the ethical aspects and fundamentals of this profession that accountants should also take into consideration as this is the only way to build and preserve society s confidence in accounting and increase its social credibility

the increasing pace of global conformance towards the adoption of international financial reporting standards ifrs highlights the need for accounting students as well as accounting practitioners to be conversant with ifrs teaching ifrs offers expert

descriptions of and insights into the ifrs convergence process from a teaching and learning perspective hence this book is both timely and likely to have considerable impact in providing guidance for those who teach financial reporting around the world the contents of the book come from authoritative sources and offer something distinctive to complement the existing textbooks which typically focus on the technical aspects of ifrs and their adoption drawing upon the experiences of those who have sought to introduce ifrs related classroom innovations and the associated student outcomes achieved therefrom the book offers suggestions about how to design and deliver courses dealing with ifrs and catalogues extensive listings of ifrs related teaching resources to support those courses this book was originally published as a special issue of accounting education an international journal

assessment is the daily life of a teacher designing plans setting questions giving feedback and grading are all activities that teachers undertake on a regular basis this book provides a practical guide on the effective use of assessment it includes the use of assessment tools and pedagogical design that help students deepen their learning major issues on assessment and some excellent examples are presented as a useful resource to university teachers in enhancing teaching and students learning

over the last decade the question of the relationship between organisations and society has been subject to much debate often of a critical nature the decade has seen protests concerning the actions of organisations exposures of corporate exploitation and unfolding accounting scandals at the same time ethical behaviour and a concern for the environment have been shown to have a positive correlation with corporate performance the nature of corporate social responsibility is therefore a topical one for businesses and academics there are however many different perspectives upon what is meant by corporate social responsibility and how this might be applied within organisations this book explores some of these different perspectives based upon the experiences of different people in different parts of the world there has been much written about globalisation some of it positive and much of it negative it is a subject which arouses definite opinions despite the fact that the word globalisation is part of the title of this book it is not our intention to contribute to this debate instead we use the word globalisation in its original sense to represent the ubiquity of the concern for corporate social responsibility csr which is the subject matter of this book specifically we are concerned with the social contract between an organisation and its stakeholders it is apparent that any actions which an organisation undertakes will have an effect not just upon itself but also upon the external environment within which that organisation resides in considering the effect of the organisation upon its external environment it must be recognised that this environment includes both the business environment in which the firm is operating the local societal environment in which the organisation is located and the wider global

environment effectively therefore there is a social contract between organizations and their stakeholders recognition of the rights of all stakeholders and the duty of a business to be accountable in this wider context therefore has been largely a relatively recent phenomenon the economic view of accountability only to owners has only recently been subject to debate to any considerable extent in the current environment there is a need to debate this issue and its implications this book therefore recognises the international scope of the interest in corporate social responsibility both through the contributions made by the authors of the respective chapters who come from various parts of the world and also through the international importance of the perspectives offered by these contributors in doing so the various authors demonstrate that corporations are a part of society just as much as each of us is as a individual furthermore they demonstrate that the issues and concerns are not local ones but are international is scope and concern us all the contributions to this book provide a representation of the range of concern for this relationship and the range of topics which fall within the subject matter of csr among the authors who have contributed to this book are representatives from every continent and from a wide range of disciplines the topics which are considered in the various chapters are equally diverse
