the first lessons we learn in school can stay with us all our lives but this was nowhere more true than in the last decades of the fourteenth century when grammar school students were not only learning to read and write but understanding for the first time that their mother tongue english was grammatical the efflorescence of ricardian poetry was not a direct result of this change but it was everywhere shaped by it this book characterizes this close connection between literacy training and literature as it is manifest in the fine and ambitious poetry by gower langland and chaucer at this transitional moment this is also a book about the way medieval training in grammar or grammatica shaped the poetic arts in the

middle ages fully as much as rhetorical training it answers the curious question of what language was used to teach latin grammar to the illiterate it reveals for the first time what the surviving schoolbooks from the period actually contain it describes what form a grammar school took in a period from which no school buildings or detailed descriptions survive and it scrutinizes the processes of elementary learning with sufficient care to show that for the grown medieval schoolboy well learned books functioned not only as a touchstone for wisdom but as a knowledge so personal and familiar that it was equivalent to what we would now call experience

alexander leggatt revisits the issue of the double plot in volpone and finds that an emphasis on simple thematic parallels between the two plots distorts the dramatic significance of their relationship as kate d levin shows conventional critical approaches have obscured both the structural peculiarities that jonson s plays share with his masques and his occasional disregard of playhouse pragmatism
