do our political systems and democracies really reflect the complex reality of the 21st century or does politics seem to be legislating about yesterday s world in his latest book daniel innerarity warns of the gap between the political concepts that serve as our guide and our overly complex reality that has long ceased to respond to them arguing that this theoretical deficit leads to a political practice that simplifies and impoverishes our democracies nourishing the demagogues and sustaining reassuring old narratives innerarity proposes a modern update of key political concepts from power and sovereignty to territory and representation the theory of democracy originates from a time of relative social and political simplicity there was less pluralism less interdependence political entities were autarkic and the technological tools they had to handle had nothing to do with the sophistication of our artificial intelligence our financial system or the technological advances in medicine and yet innerarity argues there is no need to despair if democracy has made the transition from the polis to the nation state from direct democracy to representative democracy there is no reason to suppose that it cannot face new challenges as long as it is provided with an adequate political architecture drawing on a broad range of sources including classical and contemporary theorists a theory of complex democracy presents a new theory of democracy and government for the 21st century a theory that starts from the premise that the most promising rejuvenation of our democracies is to make them more complex

corporations and the environments in which they operate are complex with changing multiple dimensions and an inherent capacity to evolve qualitatively a central premise of this study is that a postmodern reading of ethics represents an expression of and an engagement with the ethical complexities that define the business landscape in particular the

deconstructive philosophy of jacques derrida offers a non trivial reading of a complex notion of ethics and thereby helps us to develop the skills necessary to critique and intervene in our practices and to develop robust strategies for living in the absence of prescriptive ethical frameworks although a central premise of this study is that substantive ethical claims can only be generated within a given context the study nevertheless presents readers with a meta position that illustrates the type of considerations that should inform ethical reflection from a complexity perspective in order to illustrate the value that this meta position holds for business ethics these considerations are explored in terms of the implications that they hold for our understanding of corporate social responsibility for the practice of responsible management and leadership practices and for teaching business ethics
