rickey cothran and martin thiell explore the reproductive biology of crustaceans from allocation strategies at the individual level to the ecology of mating systems

aging is one of those subjects that many biologists feel is largely unknown therefore they often feel comfortable offering

extremely facile generalizations that are either unsupported or directly refuted in the experimental literature despite this unfortunate precedent aging is a very broad phenomenon that calls out for integration beyond the mere collecting together of results from disparate laboratory organisms with this in mind part one offers several different synthetic perspectives the editors rose and finch provide a verbal synthesis of the field that deliberately attempts to look at aging from both sides the evolutionary and the molecular the articles by charlesworth and clark both provide population genetic perspectives on aging the former more mathematical the latter more experimental bell takes a completely different approach arguing that aging may not be the result of evolutionary forces bell's model instead proposes that aging could arise from the progressive deterioration of chronic host pathogen interactions this is the first detailed publication of this model it marks something of a return to the type of aging theories that predominated in the 1950s and 1960s theories like the somatic mutation and error catastrophe theories we hope that the reader will be interested by the contrast in views between the articles based on evolutionary theory and that of bell mr rose and c e finch eds genetics and evolution of aging 5 12 1994 1994 kluwer academic publishers the journal of geriatric genetics of aging 2 michael r rosel caleb e

for non majors biology courses engage students in science with stories that relate to their lives biology science for life weaves a compelling storyline throughout each chapter to grab student attention through the exploration of high interest topics such as genetic testing global warming and the zika virus the authors return to the storyline again and again using it as the basis on which they introduce the biological concepts behind each story in the 6th edition new active learning features and author created resources help instructors implement the storyline approach in their course the big question is a new feature that helps students learn how to use data to determine what science can answer while developing their ability to critically evaluate information also available with mastering biology or as an easy to use standalone pearson etext mastering tm is the teaching and learning platform that empowers you to reach every student by combining trusted author content with digital tools developed to engage students and emulate the office hour experience mastering personalizes learning and often improves results for each student new to the 6th edition are author created figure walkthrough videos that guide students to solidify their understanding of the concepts within challenging illustrations as well as make the connection activities that help students bridge the gap between each storyline and the science behind it as well as ready to go teaching modules for select chapters that provide instructors with assignments to use before and after class as well as in class activities pearson etext allows educators to easily share their own notes with students so they see the connection between their reading and what they learn in class motivating them to keep reading and keep learning portable access lets students study on the go even offline and reading analytics
