in the past years there has been considerable effort to move robots from industrial environments to our daily lives where they can collaborate and interact with humans to improve our life quality one of the key challenges in this direction is to make a suitable robot control system

that can adapt to humans and interactively learn from humans to facilitate the efficient and safe co existence of the two the applications of such robotic systems include service robotics and physical human robot collaboration assistive and rehabilitation robotics semi autonomous cars etc to achieve the goal of integrating robotic systems into these applications several important research directions must be explored one such direction is the study of skill transfer where a human operator s skilled executions are used to obtain an autonomous controller another important direction is shared control where a robotic controller and humans control the same body tool mechanism car etc shared control in turn invokes very rich research questions such as co adaptation between the human and the robot where the two agents can benefit from each other s skills or must adapt to each other s behavior to achieve effective cooperative task executions the aim of this research topic is to help bridge the gap between the state of the art and above mentioned goals through novel multidisciplinary approaches in human in the loop robot control and learning
