a detailed comparison of several important areas of public policy an assessment of whether attitudes policies of the reagan administration the thatcher government are converging

the subject and purpose of this book is to make a contribution to the development and application of political economic models the point of departure is the public choice literature and in particular the interest function approach to government behaviour the book gives a critical and up to date review of the existing approaches in the public choice literature various approaches are theoretically and empirically elaborated and statistically tested using data for the netherlands moreover new models are constructed which try to explain governmental decision making with respect to government expenditure and transfer payments the models are empirically applied to the netherlands the book analyzes in detail the organization of governmental decision making and studies the implications of this structure for economic policy

it is a popular notion that money and output are separate and autonomous entities money and inflation argues that this idea can neither explain the purchasing power of money nor its variations over time and a new theory is therefore presented in its place the book aims to provide the foundations for a new analysis of inflation from a macroeconomic perspective the role of money is investigated in terms of value prices profit and capital accumulation the author argues that in order to gain a thorough comprehension of inflation it is necessary to focus on the formation of national income not on its distribution sergio rossi s new approach proposes a structural reform of modern banking systems and outlines an original macro theoretical investigation of measurement problems in price index theory despite its elective affinity with the works of ricardo walras and keynes the new analysis overturns traditional concepts of money the discussion elicits a deeper understanding of the conditions underlying today s inflationary pressures and prescribes new solutions to permanently eradicate them this unique and path breaking study will be of enormous interest to academics researchers and students involved in monetary economics as well as monetary policy makers and central bank and international banking officials

the purpose of this book is to discuss the issues involved in and to make a contribution to the endogenization of public sector behaviour in macroeconomic models to that end the traditional theory of economic policy is critically reviewed as well as the existing literature on the impact of politics on macro economic policy it is argued that van windens interest function approach offers a more useful and valuable entry to the analysis of public sector decision making it gives a coherent yet condensed picture of the impact of the various social classes on economic policy using this approach an explanatory model of public sector decision making is developed which yields behavioural equations for public expenditure public employment and taxation that appear to be suited for insertion in a macroeconomic model application of the model to data for the netherlands shows that the model can be provided with empirical support and that the power structure of society can be proxied by the relative numerical strengths of the economically active social classes taking the latter finding for granted a fully closed model of politico economic interaction is obtained the model is further generalized to account explicitly for the social security system and its income transfers and to allow for multi period decision making on bond financed budget deficits surpluses
