we might think that appearances give a *prima facie* justification for belief this is the foundation for phenomenal conservatism in epistemology mccain and moretti adapt this view by integrating it with the view that epistemic justification is a matter of explanatory relations between one's evidence and propositions supported by that evidence

this book argues that qualia do not exist and there is no phenomenal consciousness

furthermore it articulates and defends holistic behaviorism qualia or phenomenal consciousness refers to mental states that are supposedly ineffable intrinsic private and directly or immediately apprehensible in consciousness in order to have experience there must be qualia this book argues that everyone is a philosophical zombie or an individual without phenomenal consciousness the author critically engages philosophers who believe in qualia such as ned block thomas nagel david chalmers john searle and galen strawson demonstrating how the intuitions that would support the belief in the existence of qualia are mutually inconsistent and self contradictory he proceeds to claim that the physical cannot be demarcated from the nonphysical and so the hard problem of consciousness can be dissolved or dismissed in the second part of the book the author offers a defense of holistic behaviorism by drawing on hegel s philosophy of mind against qualia for behaviorism will appeal to researchers and graduate students working in philosophy of mind metaphysics and cognitive science

first book to interpret the new perspectives in learning theory complexity theory enactivism into a coherent text for teacher educ examines what learning is its relationship to teaching how current theories beliefs enable or constrain one s teachin

virtually all philosophers agree that for a belief to be epistemically justified it must satisfy certain conditions perhaps it must be supported by evidence or perhaps it must be reliably formed or perhaps there are some other good making features it must have but does a belief s justification also require some sort of awareness of its good making features the answer to this question has been hotly contested in contemporary epistemology creating a deep divide among its practitioners internalists insist that such awareness is required for justification whereas externalists insist that it isn t the first part of michael bergmann s book argues that internalism faces an inescapable dilemma either it leads to vicious regress problems and ultimately radical skepticism or it is entirely unmotivated the second part of the book begins by developing the author s own externalist theory of justification one imposing both a proper function and a no defeater requirement bergmann concludes by demonstrating the failure of two prominent critiques of externalism namely that it is infected with epistemic circularity and that it cannot respond adequately to skepticism together the two parts of the book provide a decisive refutation of internalism and a sustained defense of externalism moreover they do so while placing a high priority on making the author s opponents feel that their positions and objections are understood
