this edited book is a collection of selected papers presented at the international conference of political economy icopec 2016 the deliberate employment of the term political economy in the title international conference of political economy implies the fact that economics is perceived as an integral part of social phenomena in the international conference of political economy icopec accordingly even if economic institutions and relations form the foundations of society in the contemporary world economic development is dependent on social power and dynamics while economic policies per se are shaped by not only technical processes but also diverse interests and choices within this context politics is involved in every encounter between different economic classes social groups and genders being shaped by the visions of a better life as the subject matter of philosophy ethics and religion and at times it finds its best expression in art law on the other hand is the embodiment of all social relations which are in their essence political thus this conference does not reduce society to market relations only despite positioning the economy in the heart of social relations above all it considers the society as a political entity indeed everything constitutes the subject matter of politics the arguments in favour of purifying market relations from the influence of politics and the discourse that they take place on their own right serve to disguise the conflicts of interest and power asymmetries inherent therein this conference regards man as homo politicus as aristoteles put it rather than homo economicus in 2016 icopec conferences were turned into a conference series with its 7th conference and the main theme of the 7th conference was determined as state economic policy taxation and development ijopec publication has undertaken to publish selected papers presented at this conference in english and turkish in five different edited books in the 90s the phenomena of globalization managed to dominate political popular and academic debates while reading a newspaper or a book watching television surfing the internet or participating in a demonstration we come across the links of globalization in our everyday lives globalization as a wide term is variously blamed or credited with a huge range of negative effects e g it is often related to social problems ranging from famine to floods from pollution to poverty and from rural depopulation to urban overcrowding on the contrary globalization can be also considered as the source of success in development for instance decrease in the poverty levels economic prosperity and growth better services and enhanced awareness of human rights nevertheless some sceptics of the benefits from globalization have also described the potential ways in transforming political economic and social relations

within and between countries this transformation may lead to the benefit of human welfare worldwide t İsmail Şiriner bryan christiansen julia dobreva introduction political economy of globalization financialization crises 10 since the 80s we can observe a significant increase in the role of the financial sector this progress is often referred to as financialization financialization has many features and affects numerous different economic entities epstein 2015 stockhammer 2013 one key component is the magnificent growth of the financial sector greenwood scharfstein 2013 point out a massive rise of the financial service sector in the usa during the last 30 years the growth can be proved either by the financial sector s share in gdp the quantity of financial assets or by employment and average wages in the financial sector but this growth is not related to the usa although to a softer scope similar processes can also be observed in other oecd countries philippon reshel 2013 the financial rise has its base in the deregulation and liberalization of the financial and economic system from this point of view financialization is the cause rather than the effect this is the major difference compared to the other approaches financialization can affect the macro economy through four main channels these are income distribution investment in capital stock household debt and net exports and current account balances as a correction it is discussed that economic structures governed by financialization should be addressed on four dimensions a re regulation and reduction of the financial sector b redistribution of income from top to bottom and from capital to labour c re orientation of macroeconomic policies to stabilize domestic demand at non inflationary full employment levels and eventually d re creation of international monetary and economic policy coordination

this ambitious work presents a critique of traditional welfare theory and proposes a new approach to it radical economists robin hahnel and michael albert argue that an improved theory of social welfare can consolidate and extend recent advances in microeconomic theory and generate exciting new results as well the authors show that once the traditional welfare paradigm is appropriately modified a revitalized welfare theory can clarify the relationship between individual and social rationality a task that continues to be of interest to mainstream and nonmainstream economists alike hahnel and albert show how recent work in the theory of the labor process externalities public goods and endogenous preferences can advance research in welfare theory in a series of important theorems the authors extend the concept of pareto optimality to dynamic contexts with changing preferences and thus highlight the importance of institutional bias this discussion provides the basis for further analysis of the properties and consequences of private and public enterprise and of markets and central planning not surprisingly hahnel and albert reach a number of conclusions at odds with conventional wisdom
