my aim in writing this book is to show that the externalism of the west the prevalent tendency to pay undue regard to outward and visible results and to neglect what is inward and vital is the source of most of the defects that vitiate education in this country and therefore that the only remedy for those defects is the drastic one of changing our standard of reality and our conception of the meaning and value of life my reason for making a special study of that branch of education which is known as elementary is that i happen to have a more intimate knowledge of it than of any other branch the inside of an elementary school being so familiar to me that i can in some degree bring the eye of experience to bear upon the problems that confront its teachers i do not for a moment imagine that the elementary school teacher is more deeply tainted than his fellows with the virus of occidentalism nor do i think that the defects of his schools are graver than those of other educational institutions in my judgment they are less grave because though perhaps more glaring they have not had time to become so deeply rooted and are therefore one may surmise less difficult to eradicate also there is at least a breath of healthy discontent stirring in the field of elementary education a breath which sometimes blows the mist away and gives us sudden gleams of sunshine whereas over the higher levels of the educational world there hangs the heavy stupor of profound self satisfaction

the balance between individual independence and social interdependence is a perennial debate in japan a series of educational reforms since 1990 including the implementation of a new curriculum in 2002 has been a source of fierce controversy this book based on an extended detailed study of two primary schools in the kinki district of japan discusses these debates shows how reforms have been implemented at the school level and explores how the balance between individuality and social interdependence is managed in practice it discusses these complex issues in relation to personal identity within the class and within the school in relation to gender issues and in relation to the teaching of specific subjects including language literature and mathematics the book concludes that although recent reforms have tended to stress individuality and independence teachers in primary schools continue to balance the encouragement of individuality and self direction with the development of interdependence and empathy
