this textbook in palliative care nursing draws together the principles and evidence that underpins practice to support nurses working in specialist palliative care settings and those whose work involves end of life care

this landmark text is the key resource for nurses working in the field of palliative care edited by renowned nursing experts and written by a dynamic team of internationally known authorities in nursing and palliative medicine the oxford textbook of palliative nursing covers the gamut of principles of care from the time of initial diagnosis of a terminal disease to the end

of a patient's life and beyond the text is distinctively developed to highlight the nurse's vital role as part of an integrated palliative care team. Various care settings are discussed including the hospital, ICU, home care, and hospice. Chapters focus on the practical aspects of nursing care including symptom assessment, patient teaching, family support, psychosocial aspects of palliation, and spiritual care. New to the fourth edition are chapters on the national consensus project for quality palliative care guidelines, palliative care of veterans, palliative care in rural settings, disaster situations, palliative care in eastern Europe, and palliative care in the Philippines.

This title is directed primarily towards health care professionals outside of the United States. Content has been thoroughly revised and updated in line with changes in practice and policy both locally and internationally. Particularly, the UK NICE guidance on supportive and palliative care for people with cancer and the care of the dying pathway it reflects the rapid development of palliative nursing as an emerging specialty. It helps in the process of defining palliative nursing and how it interfaces with other disciplines within the specialty. The text is divided into three sections and comprehensively yet sensitively covers all aspects of palliative nursing. Key themes covered include pain control, symptom control, loss and grief, and handling loss. A strong emphasis is placed on the integration of theory and practice and evidence-based care. Reconciliation of the theory and practice is achieved by the use of case studies. It addresses malignant and non-malignant palliative care, research, and extensive literature support. Each chapter content has been thoroughly revised and updated in line with changes in practice and policy both locally and internationally. Particularly, the UK NICE guidance on supportive and palliative care for people with cancer and the care of the dying pathway. Three new chapters on sexuality, care of the dying pathway, changing roles of the nurse in palliative care. New appendix on North American drug names/equivalents for the international market.

What can nurses do to support those receiving palliative care? How do you ensure clear communication and maintain patients and families' preferences? Palliative care nursing is essential reading for nursing students, professional nurses, and other health and social care professionals providing supportive and palliative care to those with advanced illness or who are towards the end of life. This third edition of the acclaimed textbook has been extensively revised and examines important research, studies, key debates around care, and strategies to advance palliative care nursing. In four sections, the book covers key elements of nursing practice towards the end of life, defining the palliative care patient, providing palliative nursing care, caring around the time of death, challenging issues in palliative care nursing. Leading authors address contemporary issues and explore how to provide high-quality, person-centred palliative care, encouraging application to practice through exercises and case studies. Chapters completely reworked or new for this edition include those on communication, living with uncertainty, bereavement, care, the costs of caring, nurses' decision making and capacity, and palliative care worldwide. The clarity of evidence presented and coverage of a diverse range of topics make this the foundational textbook for all studying palliative care at pre-registration level, postgraduate level, or as part of CPD study, with a foreword by last edition editor Professor Sheila Payne, Lancaster University, UK. I welcome this third edition of palliative care nursing and congratulations to the new team who have provided us with a dynamic and innovative development of a core text for palliative nursing practice as the largest workforce in palliative care.

and given the changing face of clinical practice for nurses including increased educational opportunity and expanding roles and responsibilities this book is timely in its focus on critical issues which frame and scope the reality of palliative care and the nursing contribution to that discipline the learning exercises in particular offer tools for educators and clinicians to reflect on practice and understand new ways of knowing in palliative care it will be an excellent resource for nursing both in the uk and ireland and to the wider international audience having drawn on the breadth of global nursing expertise to bring this book together philip larkin professor of clinical nursing palliative care university college dublin and our lady s hospice and care services dublin ireland president european association for palliative care this is a book of substance that captures the current status of palliative nursing including the values and research evidence that underpin it the changing nature of palliative nursing as an evidence based specialism is balanced with practical skills and insights from experts and also considers the needs of those working with or concerned about the dying person s well being it covers a range of challenging issues as well as drawing on the wisdom of those who actually undertake this work on a daily basis i hope that students and practitioners from all disciplines will find this a useful resource to understand the art and craft of good palliative nursing professor daniel kelly fellow of the royal college of nursing and royal college of nursing chair of nursing research cardiff university uk

originally published in 2001 the textbook of palliative nursing has become the standard text for the field of hospice and palliative care nursing in this new edition the authors and editors have updated each chapter to ensure that the content is evidence based and current references are included they also have retained the important focus on case studies throughout the text and practical clinically relevant tables figures and other resources like the previous edition this text has an introductory section of the general principles of palliative care followed by a comprehensive section on symptom assessment and management encompassing twenty one different symptoms other key sections include psychosocial support and spiritual care providing holistic perspective on care of patients facing advanced disease the text also includes an innovative section on special populations addressing those most in need of palliative care the textbook is a useful resource for all nurses with the excellent section on end of life care across settings in this new edition the pediatric palliative care section has been greatly expanded and includes seven separate chapters on pediatric care it includes a section on special issues addressing topics such as ethical considerations nursing research and public policy perspectives and concludes with a section presenting models of excellence including six international models this edition also offers a narrative on dying based on a spouse s perspective the text includes an appendix with an extensive list of resources for nurses in the field
