digital technology offers significant political economic and societal opportunities at the same time the notion of digital sovereignty has become a leitmotif in german discourse the state s capacity to assume its responsibilities and safeguard society s and individuals ability to shape the digital transformation in a self determined way the education sector is exemplary for the challenge faced by germany and indeed europe of harnessing the benefits of digital technology while navigating concerns around sovereignty it encompasses education as a core public good a rapidly growing field of business and growing pools of highly sensitive personal data the report describes pathways to mitigating the tension between digitalization and sovereignty at three different levels state economy and individual through the lens of concrete technical projects in the education sector the hpi schul cloud state sovereignty the merlot data spaces economic sovereignty and the openhpi platform individual sovereignty

the united nations world water assessment programme wwap is hosted and led by unesco wwap brings together the work of 31 un water members as well as 38 partners to publish the united nations world water development report wwdr series the annual world water development reports focus on strategic water issues un water members and partners all experts in their fields contribute with latest findings on a specific theme this edition of the world water development report focuses on water and jobs and seeks to inform decision makers inside and outside the water community about the importance of the water and jobs nexus for the social and economic development and environmental sustainability of countries rich and poor the importance of water for jobs across economies is such that this report could be subtitled no water no jobs indeed a great majority of jobs are dependent upon water and therefore increasingly at risk under conditions of water scarcity t

this volume focuses on multilateralism in the 21st century and examines how and how effectively the eu delivers on its commitment to effective multilateralism presenting results generated by mercury an eu research programme into multilateralism this book addresses a central research question does the eu deliver on its commitment to effective multilateralism globalisation has created powerful new incentives for states to cooperate and has generated renewed interest in multilateralism while a large body of work exists on multilateralism as a concept it continues to be ill defined and poorly understood this book sheds new light on 21st century multilateralism by exploring conceptual approaches as well as generating innovative empirical knowledge on its practice research on eu external relations has

increasingly focused on the concept of effective multilateralism yet the application of this concept as a guiding principle of eu foreign policy in non security policy areas has rarely been examined this book explores whether the eu is pursuing effective multilateralism in specific policy areas including trade climate change and conflict resolution and distinct geographical and institutional settings both internal to the eu and in specified regions international organisations ios and bilateral partnerships this book offers evidence based actionable policy lessons from europe s experience in promoting multilateralism the european union and multilateralism in the 21st century will be of interest to students and scholars of international relations international organizations and european union politics and foreign policy

this book performs a swot strengths weaknesses opportunities and threats analysis to examine the current food crisis and how it relates to the use of crops for energy it analyses how energy crops may help solve humankind s environmental changes and summarises the economic and practical changes of cultivating and utilising energy crops two of humanity s greatest challenges are the need for more food production as well as growing demands for energy biofuel cultivation has been identified as a solution to growing energy use and biomass power plants offer a rare renewable energy source that requires only basic technology in this context a dilemma arises concerning whether energy crops should be used for energy or to help remedy the food crisis swot analysis allows us to organise and weigh different pros and cons against each other in terms of economics job creation environmental impacts the climate change agenda and european union eu directives that promote biofuels over fossil fuels by pursuing this approach the book helps researchers and decision makers cut through the many competing arguments in connection with this complex subject
