*Statistics for Dummies* shows you how to interpret and critique graphs and charts, determine the odds with probability, guesstimate with confidence using confidence intervals, set up and carry out a hypothesis test, compute statistical formulas, and more. Tracks to a typical first semester statistics course, updated examples resonate with today's students. Explanations mirror teaching methods and classroom protocol, packed with practical advice and real world problems. *Statistics for Dummies* gives you everything you need to analyze and interpret data for improved classroom or on the job performance. *Statistics II for Dummies* is the ideal supplement and study guide for students preparing for advanced statistics, packed with fresh and practical examples appropriate for a range of degree-seeking students. *Statistics II for Dummies* helps any reader succeed in an upper-level statistics course. It picks up with data analysis where *Statistics for Dummies* left off, featuring new and updated examples, real world applications, and test-taking strategies for success. This easy-to-understand guide covers such key topics as sorting and testing models using regression to make predictions, performing variance analysis, ANOVA, drawing test conclusions with chi-squares, and making comparisons with the rank-sum test. About the author: Deborah Rumsey has a PhD in statistics from the Ohio State University. Upon graduating, she joined the faculty in the department of statistics at Kansas State University, where she won the distinguished presidential teaching award and earned tenure and promotion. She returned to Ohio State and is now a statistics education specialist, auxiliary faculty member for the department of statistics. Dr. Rumsey has served on the American Statistical Association's Statistics Education Executive Committee and is the editor of the Teaching Bits section of the *Journal of Statistics Education*. She is the author of the both books in this bundle. Additionally, she has published many papers and given many professional presentations on the subject of statistics education. Her particular research interests are curriculum materials development, teacher training and support, and immersive learning environments.

*Introductory Statistics for the Health Sciences* takes students on a journey to a wilderness where science explores the unknown, providing students with a strong practical foundation in statistics using a color format throughout the book. Contains engaging figures that illustrate real data sets from published research. Examples come from many areas of the health sciences including medicine, nursing, pharmacy, dentistry, and physical therapy, but are understandable to students in any field. The book can be used in a first semester course in a health sciences program or in a service course for undergraduate students who plan to enter a health sciences program. The book begins by explaining the research context for statistics in the health sciences, which provides students with a framework for understanding why they need statistics, as well as a foundation for the remainder of the text. It emphasizes kinds of variables and their relationships throughout, giving a substantive context for descriptive statistics, graphs, probability, inferential statistics, and interval estimation. The final chapter organizes the statistical procedures in a decision tree and leads students through a process of assessing research scenarios. Resource: The authors have partnered with William Howard Beasley, who created the illustrations in the book, to offer all of the data sets, graphs, and graphing code in an online data repository via GitHub. A dedicated website gives information about the data sets and the authors' electronic flashcards for iOS and Android devices. These flashcards help students learn new terms and concepts.

*Essentials of Business Statistics* presents basic statistical concepts including descriptive statistics, probability, and elementary inferential statistics in a student-oriented style. All concepts are developed
