this haunting question in all of its variations and interpretations has echoed through the annals of time since the dawn of philosophy the world's intellectual titans have grappled valiantly with this enigma and many of them dedicated entire lifetimes to unearthing answers in religion aesthetics love personal convictions and myriad other realms but to no avail how has this ineluctable conundrum come to signify everything and nothing to term it the holy grail of philosophy is almost to insultingly undersell its gravitas the meaning of life remains maddeningly elusive mocking our most desperate curiosities despite over 2 500 years of introspection debate and countless theories its mysterious

prize remains unclaimed however this tome is no mere philosophical expedition for it is a revolution in the making it manifests a rebellion against the two thousand year old foundations of speculation and dares to shatter the orthodoxy by venturing into the forbidden realm of a science philosophers long denied as relevant and converging the scientific method with peerless reasoning the sort that would stupefy the most weathered thinkers this most eminent opus heralds philosophy s renaissance no longer as a quaint forgotten relic of bygone eras but as a vanguard discipline poised for reawakening

this book explores the relationship between space subjectivity and property in order to invert conventional socio legal understandings of property sarah keenan demonstrates that new political possibilities for property may be unveiled by thinking about property in terms of space and belonging rather than exclusion drawing on feminist and critical race theory this book shifts focus away from the propertied subject and on to the broader spaces in and through which the propertied subject is located using case studies such as analyses of compulsory leases under australia s northern territory intervention and lesbian asylum cases from a range of jurisdictions keenan argues that these spaces consist of networks of relations that revolve around belonging not just belonging between subject and object as property is traditionally understood but also the less explored relation of belonging between the part and the whole this book therefore offers a conceptually useful way of analysing a wide range of socio legal issues it will be of relevance to those working in the area of property and legal geography but also to those with more general interests in socio legal studies social and political theory postcolonial studies critical race studies and gender and sexuality studies
