a fundamental assumption underlying the formation of our most important relationships is that they will persist indefinitely into the future as an acquaintanceship turns into a friend ship for example both members of this newly formed interpersonal bond are likely to expect that their interactions will become increasingly frequent diverse and intimate over time this expectation is perhaps most apparent in romantically involved couples who through a variety of verbal and symbolic means make explicit pledges to a long lasting relationship in either case it is clear that these relationships represent something valuable to the individuals in volved and are pursued with great enthusiasm virtually all close relationships are formed within the context of mutually rewarding in teractions and or strong physical attraction between partners friends and romantically in volved couples alike are drawn to one another because of similarity of attitudes interests and personality and quite simply because they enjoy one another s company this enjoyment cou pled with the novelty that characterizes new relationships almost makes the continuation of the relationship a foregone conclusion as relationships progress however their novelty fades conflicts may arise between partners negative life events may occur and the satisfaction that previously characterized the relationships may diminish
