developments in network and switching technologies have made telecommunications systems and services far more data intensive this can be observed in many telecommunications areas such as network management service management and service provisioning for example in the area of network management the complexity of modern networks leads to large amounts of data on network topology configuration equipment settings etc in addition switches generate large amounts of data on network traffic faults etc in the area of service management it is the registration of customers customer contacts service usage e.g. call detail records cdrs that leads to large databases for mobile services there is

the additional tracking and tracing of mobile equipment in the area of service provisioning there are the enhanced services like for example umts the next generation of mobile networks but also the deployment of data intensive services on broadband networks such as video on demand high quality video conferencing and e commerce infrastructures this results in very large databases growing at high rates especially in new service areas the integration of network control network management and network administration also leads to a situation where database technology gets into the core of the network e g in architectures like tmn in and tina

retail service quality is a vital driver in determining customer satisfaction which in turn promotes customer loyalty and reduces switching intentions service quality is a solution to build customer satisfaction which could lead to customer loyalty hence reducing switching intentions the current study has investigated the interrelationship between service quality customer satisfaction customer loyalty with switching intentions of customers and the moderating role of price discounts and store ethnicity in a single framework random sampling was used by administering standardized questionnaires personally to 450 hypermarket customers located in the eastern province of saudi arabia the results confirmed that retail service quality has significant positive influence on customer satisfaction and the positive effect of customer satisfaction on customer loyalty besides the study verified store ethnicity and price discounts acted as moderating mechanism for explaining the switching intentions of satisfied and loyal customers the results serve as a guideline for top managers of the hypermarkets to design appropriate policies and strategies in terms of retail service quality price discounts and identifying the needs of ethnic groups in a particular region this will help to enhance customer satisfaction and customer loyalty hence reducing switching intentions of customers
