rum is a theory of applicative side effect free computations over an algebraic data structure it goes beyond a theory of functions computed by programs treating both intensional and extensional aspects of computation powerful programming tools such as streams object oriented programming escape mechanisms and co routines can be represented intensional properties include the number of multiplications executed the number of context switches and the maximum stack depth required in a computation extensional properties include notions of equality for streams and co routines and characterization of functionals implementing strategies for searching tree structured spaces precise definitions of informal concepts such as stream and co routine are given and their mathematical theory is developed operations on programs treated include program transformations which introduce functional and control abstractions a compiling morphism that provides a representation of control abstractions as functional abstractions and operations that transform intensional properties to extensional properties the goal is not only to account for programming practice in lisp but also to improve practice by providing mathematical tools for developing programs and building programming systems rum views computation as a process of generating computation structures trees for context independent computations and sequences for context dependent

computations the recursion theorem gives a fixed point function that computes computationally minimal fixed points the context insensitivity theorem says that context dependent computations are uniformly parameterized by the calling context and that computations in which context dependence is localized can be treated like context independent computations

the authors of this volume argue that urban education is in urgent need of reform and that although there have been plenty of innovative and even promising attempts to improve conditions most have been doomed the reason for this they agree lies in the failure of our major cities to develop their civic capacity the ability to build and maintain a broad social and political coalition across all sectors of the urban community in pursuit of a common goal

ranging broadly from andrew jackson to bill clinton and george w bush stuckey demonstrates how presidents accomplish the dual enactment of inclusion and exclusion through their rhetorical and political choices our early leaders were preoccupied with balancing the growing nation later presidents were concerned with the nature and definitions of citizenship by examining the political speeches of presidents exemplifying distinctly different circumstances she presents a series of snapshots which when taken together reveal both the continuity and the changes in our national self understanding

broadens the scope and meaning of american indian political activism by focusing on the movement s early and largely neglected struggles revealing how early activists exploited cold war tensions in ways that brought national attention to their issues

reexamination of the role of the west in u s history and of the field of western history itself told by ten historians

she reveals how conviction style politicians have appeared in the u s and u k at the same time individuals who

articulated similar ideas that adapted liberal ideology to shifting circumstances and who achieved fundamental change at critical moments in their nations histories
