culturally divergent often concealed moral concept with a direct impact on human actions and thinking hofstede has devoted himself to this issue and has developed a model based on a long time study elucidating peculiarities of and differences between national cultures in comparison thereby hofstede classified national cultures according to five pillars also called dimensions which dependent on the nation vary markedly and in his study are set in relation to each other the subject and the goal of this assignment is to present the main features of hofstede s model of the five dimensions of national cultures following the practical applicability of this model is briefly discussed

the crucial element of this book constitutes the synthesis of cultural dimensions from existing cultural taxonomies extended by the operationalization of the eight identified universal dimensions of culture udcs into a questionnaire first an extensive systematic literature review slr is pursued to identify the current state of research demonstrating the research gap on a unified approach for classifying national cultures into cultural dimensions eight assumptions displaying the eight udcs are derived from the results of the slr subsequently an evaluation and selection framework for identifying the research base of comparable existing cultural taxonomies is developed a research base of 11 cultural taxonomies and 50 cultural dimensions is retrieved these serves as the basis for developing the eight udcs following a synthesis process and protocol the eight udcs are operationalized into a questionnaire which is extensively pre tested by experts and in the field an example country study for germany canada and brazil is conducted and the corresponding country profiles for the eight udcs are displayed
