this book is designed for healthcare professionals who desire to become critical and intelligent consumers of research literature in their chosen fields it provides general guidelines in highly specific terms to students to critically evaluate whether particular research is valuable based on the appropriateness of research design methodology and statistics this book offers a clear road map for healthcare professionals to apply knowledge obtained from good research in appropriate publications and also to apply that knowledge in everyday practice plainly speaking this book enables healthcare professionals to use this newly gained critical acumen in their practice

as more and more people survive into old age the burden of caring for them becomes greater and greater although it is now possible to alleviate many of the afflictions that beset mankind no society can afford to pay for all the healthcare that is now available or technically possible people working in healthcare increasingly have to do more with less rationing takes many forms mostly covert and the less privileged in most societies end up struggling to get their proper share of the available healthcare resources all too often those in the front line have to deal with the consequences of this rationing by default healthcare professionals find themselves rushed off their feet simply doing the basic tasks and completing all the paperwork placing frail sick people in ever lengthening queues sometimes asking them to wait for hours in the middle of the night under uncomfortable and even unsafe conditions and worst of all working under conditions they would rather avoid in which the safety margin for those they

are caring for has been greatly diminished we are all aware that under these conditions the chance of making a mistake which can seriously harm or even lead to the death of a patient is greatly increased but what can be done about this how can you be sure that you are doing the right thing when faced with having to practise an uncertain science on vulnerable patients in a complex system under ever changing conditions at what point could you cross the invisible line from reasonable to irresponsible or unethical behaviour by tolerating conditions or tacitly accepting practices which may be regarded as unacceptable even though you may have little immediate control over them this book is a guide to getting it right for healthcare professionals it is about doing the right thing in the right way at the right time for the right people these are the dimensions of quality in healthcare and although some are in conflict equitable access and efficiency for example adherence to ethical practice and professional behaviour will help lead healthcare practitioners through the minefield of responsibilities and priorities real life situations are integral to the book with over 500 clinical examples referred to within the text

this book provides expert insights and strategies to help readers find their best career path in healthcare it features healthcare professionals and their stories giving unfiltered unedited no holds barred version of what it s really like to be a healthcare professional in the 21st century

an informative guide to all key aspects of employability for graduating students educators managers and qualified healthcare professionals written specifically for health professionals focusing on their needs and the challenges they face maximising employability potential and managing career progression packed full of potential interview questions reflection opportunities and case studies throughout includes chapter on professionalism continuing professional development cpd and leadership
