john mcmurry s best selling text presents organic chemistry in a new edition that is up to date

beautifully written visually striking and pedagogically sound described by many of its users as an eminently teachable text mcmurry sets the standard in the field the writing style has received almost universal acclaim from its users mcmurry introduces new concepts only as needed and immediately illustrates them with concrete examples and wherever possible he ties material together with brief reviews overviews and reaction summaries the result is a text that helps students mentally organize the material a text that helps them understand concepts not just memorize facts and a text that helps them make sense of the voluminous amount of material they encounter in the study of organic chemistry mcmurry uses a simple but important polar reaction the addition of hbr to an alkene as the lead off reaction to illustrate the general principles of organic reactions users of former editions found this an excellent choice because of its relative simplicity no prior knowledge of chirality or kinetics is required and its importance as a polar reaction on a common functional group that offers students the key to understanding hundreds of thousands of ionic reactions by selecting this particular model mcmurry is able to offer an unusually early presentation of organic reactions

there has been repeated criticism in recent years from a variety of sources about both the quantity and quality of legislation the committee s inquiry into ensuring standards in the quality of legislation has considered these criticisms analysed the core problems and causes of bad quality legislation and looked to provide solutions for both the government and parliament to improve the quality of legislation the scottish parliament northern ireland assembly and national assembly for wales have adapted the westminster model in order to improve the quality of their legislation it is now the turn of westminster to look at their processes and adapt them for use here the committee has concluded that it would be beneficial for parliament and the government to work together to agree standards for what makes good legislation and as a starting point for discussion publishes a draft code of legislative standards with the report the committee also recommends the creation of a joint legislative standards committee to provide oversight of the cabinet s parliamentary business and legislation committee s approach to and use of the finalised code of legislative standards to ensure that the quality standards set out in the code of legislative standards are met the committee considers that these recommendations would also improve the quality of constitutional legislation in particular by requiring the government to adopt an agreed test to identify constitutional legislation and thereby improve parliament s scrutiny of it
