Although much has been written of the nature of history and its disciplinary problems, less attention has been paid to the history of thought. M. C. Lemon's rigorously philosophical work first reasserts the discipline of history in general as narrative-based, before pursuing the methodological implications for the history of thought. This original work of scholarship will raise the level of argument in philosophy of history and provoke debate among historians, philosophers and political theorists.

An effort to put in brief but permanent form the many scattered records of historic Baldwin.
