this warm sometimes funny and deeply emotional memoir tells what it was like growing up more than half a century ago in pre castro cuba roberto lópez recounts a very personal story of family school experiences and friendships he relates what it was like to be cuban and what cuba in those days looked and felt like the streets of old havana and his lively neighborhood where streetcars were so crowded passengers might have to climb on top where peddlers plied everything from fish to sweets and where men gathered in the bodegas to play dice on shiny mahogany counters while drinking beer or downing cup after cup of hot black sweet and wickedly strong coffee lópez wrote island of memory primarily as a tribute to a people and a place but he also tells what it was like when things ruptured when the communists took over and made it impossible for him to stay or to return

no one anticipated in 1958 that in the midst of a remarkable prosperity cuba would fall into communism it seemed impossible that an island 90 miles from the us the most powerful capitalistic country in the planet could turn communist yet in two years it happened at the cost of hundreds of lives thousands of exiles the eradication of free press freedom of speech private education freedom of worship and private property now everything belonged to the government all cubans had to ask permission to travel abroad if they left they could not return the government decided what foods they could eat where they had to live what professions they could practice and what jobs were open to them this book presents the history of how it happened how it got started and the deceit and the treachery that made it possible cuba has not recovered its lost freedoms after 60 plus years of communism and probably never will great lesson for anyone sympathetic with marxism or the radical left

the people s professors how cuba achieved education for all describes how cuba managed in spite of scarce resources to successfully educate its entire population after the revolution in 1959 it details how illiterate peasants learned to read and write how the nation s vision of education was developed how the national school system was doubled in size thousands of teachers were educated and now how cuba is entering the realm of digital media and the internet the people of cuba can read and write better than the citizens of most countries including the united states moreover cubans excel on international measures of math science the arts and healthcare this book considers cuba s schools as well as its integrated systems such as healthcare and community mental health and makes a case for the principles that education is a human right and that teaching is the responsibility of everyone
