numerous previous studies have examined the economic impacts of trade measures on forest

product markets most have focussed on either tariffs or rather obvious quantitative measures such as import or export quota restrictions there is growing concern about the impact of the far less obvious non tariff trade measures on the global forest product sector the objective of this study is to fill a gap and to estimate trade and economic impacts of nontariff barriers and compare them to the impacts of tariffs a database of ad valorem equivalent estimates for a set of well defined non tariff trade restrictions is incorporated into a global forest products trade model non tariff barriers are found to be less common than tariffs but are found to have similar or bigger aggregate impacts than tariffs do on trade production producer revenues consumer expenditures and value added impacts of reducing tariff and non tariff barriers are often different across regions and products our results underscore the importance of analysing both types of trade policy and the need for continuing comprehensive trade liberalization

law in civil society advances a new and comprehensive theory of how legal institutions should be reformed to uphold the property family and economic rights of individuals in civil society in so doing it offers a powerful challenge to the dominant legal theories and practices espoused by liberalism positivism natural law and critical legal thought winfield argues against the prevailing assumptions of legal philosophers who dogmatically embrace formal or historical conceptions of law true law he contends must be constructed within the context of the different spheres of rights and ultimately can only exist within a civil society committed to self determination and community

working from these fundamental premises he analyzes in detail a rich array of important legal issues fair access to legal representation the rationale for jury trials appropriate distinctions between civil and criminal legal procedures the controversies pitting common law versus codification and adversarial versus inquisitorial systems of trial and the relationship between civil society and the state much inspired by hegel s philosophy of right winfield s study offers the most convincing critique yet of that renowned philosopher s work and in the process provides a more complete and coherent conception of law than hegel himself articulated provocative and highly instructive the book should attract scholars teachers and students in legal and political philosophy and anyone else with an abiding interest in the foundations of western law

a quiet revolution is taking place in america s forests once seen primarily as stands of timber our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized now as timber harvesting becomes more mechanized and requires less labor the image of the lumberjack is being replaced by that of the forager this book provides the first comprehensive examination of nontimber forest products ntfps in the united states illustrating their diverse importance describing the people who harvest them and outlining the steps that are being taken to ensure access to them as the first extensive national overview of ntfp policy and management specific to the united states it brings together research from numerous disciplines and analytical perspectives such as economics mycology history ecology law entomology forestry geography and anthropology in order to provide a cohesive picture of the current and potential role of ntfps the contributors review the state of scientific knowledge of ntfps by offering a survey of commercial and noncommercial products an overview of uses and users and discussions of sustainable

management issues associated with ecology cultural traditions forest policy and commerce they examine some of the major social economic and biological benefits of ntfps while also addressing the potential negative consequences of ntfp harvesting on forest ecosystems and on ntfp species populations within this wealth of information are rich accounts of ntfp use drawn from all parts of the american landscape from the pacific northwest to the caribbean from honey production to a review of nontimber forest economies still active in the united states such as the ojibway harvest of plants recounted here the book takes in the whole breadth of recent ntfp issues including ecological concerns associated with the expansion of ntfp markets and ntfp tenure issues on federally managed lands no other volume offers such a comprehensive overview of ntfps in north america by examining all aspects of these products it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests
