higher education is in trouble commentators of all stripes bemoan escalating costs and diminishing quality solutions have been offered from all quarters but tend to be piecemeal and all too often ideological in this tough minded look at the history current climate and future of university education in the united states melvyn l fein reexamines the mission of higher education and outlines what institutions can do to better prepare students for an ever more complex techno commercial society fein argues that students must have the opportunity to explore and discover what works for them and that the most important tool for institutions of higher education is self direction professors must be allowed to teach in their own ways bringing their own experience into the classroom since university missions differ both universities and professors need the freedom to make decisions independently the imminent need is for a democratic elite consisting of self directed leaders who possess technical and social expertise as well as personal motivation the tools for change are appropriate curricula

communities of learners and a genuine marketplace of ideas while there is no magic bullet fein contends that we can and should build on the achievements of the past so as to evolve more responsive educational institutions those that promote merit responsibility and universalism

presidential campaigns have seen revolutionary changes in the past few decades in the united states and elsewhere these changes include rapid advances in communications technology and marketing and survey methodology an increased involvement of non party groups and campaign professionals in electoral politics a decreased role for political parties in the recruitment screening and nominating of candidates and dramatic changes in campaign finance laws while changes in presidential campaigning have not gone unnoticed analysis of these changes is typically included in general works on presidential campaigns and elections or studied individually baumgartner clarifies what is meant by candidate centered as it applies to the organization and operation of presidential campaigns and elections he demonstrates that campaign organizations have become increasingly more central to the campaign effort than party organizations throughout the process of presidential selection and he shows that what is happening to electioneering practices in the united states is also happening although still to a lesser extent in france and russia
