christianity today 2013 book award winner winner of the foundation for pentecostal scholarship s 2012 award of excellence 2011 book of the year christianbook com s academic blog most modern prejudice against biblical miracle reports depends on david hume s argument that uniform human experience precluded miracles yet current research shows that human experience is far from uniform in fact hundreds of millions

of people today claim to have experienced miracles new testament scholar craig keener argues that it is time to rethink hume s argument in light of the contemporary evidence available to us this wide ranging and meticulously researched two volume study presents the most thorough current defense of the credibility of the miracle reports in the gospels and acts drawing on claims from a range of global cultures and taking a multidisciplinary approach to the topic keener suggests that many miracle accounts throughout history and from contemporary times are best explained as genuine divine acts lending credence to the biblical miracle reports

despite the assumption that we live today in a rather rationalist and mechanized world there remain many aspects that neither medicine nor physics can fully explain the catholic church continues to pronounce individuals as saints because scientifically confirmed miracles are associated with them if we want to gain a solid understanding of the pre modern history of mentality emotions and everyday culture it proves to be highly revealing to examine what miracles and wonders had meant at that time both in the theological and medical field in the visual arts and literature as a matter of fact people both in the east and in the west have consistently flocked to pilgrimage sites all over the world in the hope that a miracle might happen and solve issues for them the contributors to this volume based on a symposium at the university of arizona may 2024 approach this critically important topic from many different perspectives taking us from the early middle ages to the early modern age examining hagiographical medical literary and alchemical texts discussing both miracles and wonders as relevant themes in the public discourses both the passage through inferno and purgatorio as the crucial pathway toward paradiso and the experience of women s miraculous conception are identified as deeply impactful for the pre modern world and this both in christian and muslim cultures studying miracles and wonders through a kaleidoscope of different materials and concepts makes it possible to gain a closer understanding of people s mindsets power structures and the debate between medicine and religion these topics were also greatly important in other cultures as several papers on arabic medieval literature indicate further pursuing this global issue we recognize easily that the separation line between the middle ages and the early modern period is only a modern construct and often not that helpful because the discourse on miracles and wonders has continued and influences even us today

erkki koskenniemi analyzes the most important early jewish texts which attribute miracles to people mentioned in the old testament his study is relevant for everyone investigating the miracles in early judaism or early christianity book jacket

geographical information systems gis either as standard gis or custom made historical gis hgis have become quite popular in some historical sub disciplines such as economic and social history or historical geography mainstream history however seems to be rather unaffected by this trend more generally speaking why is it that computer applications in general have failed to make much headway in history departments despite the first steps being undertaken a good forty years ago with the spatial turn in full swing in the humanities and many historians dealing with spatial and geographical questions one would think gis would be welcomed with open arms yet there seems to be no general anticipation by historians of employing gis as a research tool as mentioned hgis are popular chiefly among historical geographers and social and economic historians the latter disciplines seem to be predestined to use such software through the widespread quantitativemethodology these disciplines have employed traditionally other historical sub disciplines such as ancient history are also very open to this emerging technology since the scarcity of written sources in this field can be mitigated by inferences made from an hgis that has archaeological data stored in it for example in most of modern history however the use of gis is rarely seen the intellectual benefit that a gis may bring about seems not be apparent to scholars from this sub discipline and others this book wants to investigate and discuss this controversy why does the wider historian community not embrace gis more readily while one cannot deny that the methodologies linked with a gis follow geographical paradigms rather than historical ones the potential of gis as a killer application for digital historical scholarship should be obvious this book brings together authors from geography and history to discuss the value of gis for historical research the focus however will not be on the how but on the why of gis in history

graham twelftree extensively examines the miracles of each gospel narrative he weighs their historical reliability and considers the question of miracles and the modern mind
