value creation and its effects on transfer pricing and tax law emerging from the oecd g20 beps project a new somewhat fuzzy notion of value creation came to permeate not only transfer pricing language but also wider allocation rules and anti abuse provisions in international tax law the notion of value creation reframes the interpretation and application of the arm's length principle alp that is embedded in articles 7 and 9 of the oecd model convention this new value creation notion and approach assist in understanding key enterprise functions while different industry sectors manifest these concepts in various ways situating such notions and this approach within the law of tax treaties and analyzing terms of the oecd transfer pricing guidelines alongside their factual context is the aim of this book here law students address transfer pricing and value creation in sectors as varied as commodities trade automotive consumer products food and beverages pharmaceutical and life sciences telecommunications and the key topic of value creation in a digitalized economy our ll m students were required to address issues not explored in legal research and to discuss factual topics relevant for transfer pricing all students focused on topics that are new to the international tax debate that keep evolving and on factual matters that often escape legal research

david colander has been writing about economic methodology for over 30 years but he goes out of his way to emphasize that he does not see himself as a methodologist his pragmatic methodology is applicable to what economists are doing and attempts to answer questions that all economists face as they go about their work the articles collected in this volume are divided with the first part providing a framework underlying colander's methodology and introducing colander's methodology for economic policy within that framework part two presents colander's view on the methodology for microeconomics while part three looks at colander's methodology for macroeconomics the book closes with discussions of broader issues

over the last 50 years the community of heterodox economists has expanded and its publications have proliferated but its power in departments of economics has waned addressing this paradox this book argues that heterodox economists are defined more by left ideology than by a shared understanding of the nature of orthodox economics and of what should replace it heterodox economists cannot agree on what heterodoxy means this volume applies work on the social nature and institutions of science to help explain the failure of heterodox economics to gain ground it assesses some strategic options for its future

the economics of scientific misconduct explores episodes of misconduct in the natural and biomedical sciences and replication failure in economics and psychology over the past half century here scientific misconduct is considered from the perspective of a single discipline such as economics likely for the first time in intellectual history research misconduct has become an important concern across many natural medical and social sciences including economics over the past half century initially a mainstream economic approach to science and scientific misconduct draws from conventional microeconomics and the theories of becker ehrlich and c s peirce s economy of research then the works of peirce and thorstein veblen from the 19th century point toward contemporary debates over statistical inference in econometrics and the failure of recent macroeconomic models in more contemporary economics clashes regarding discrimination and harassment have led to a code of professional conduct from the american economic association and a code of ethics from one of its members the last chapter considers research ethics matters related to the covid 19 pandemic there has been an explosion of research and some retractions more generally a concern with research ethics contributes to scientific progress by making some of its most difficult problems more transparent and understandable and thus possibly more surmountable this book offers valuable insights for students and scholars of research ethics across the sciences philosophy of science and social science and economic theory
