the fourth volume of the new cambridge medieval history covers the eleventh and twelfth centuries which comprised perhaps the most dynamic period in the european middle ages this is a history of europe but the continent is interpreted widely to include the near east and north africa the volume is divided into two parts of which this the second deals with the course of events ecclesiastical and secular and major developments in an age marked by the transformation of the position of the papacy in a process fuelled by a radical reformation of the church the decline of the western and eastern empires the rise of western kingdoms and italian elites and the development of governmental structures the beginnings of the recovery of spain from the moors and the establishment of western settlements in the eastern mediterranean region in the wake of the crusades

samuel p müller offers here the first book length study of the image of latins in byzantine historiography of the long twelfth century arguing that this image is more complex and ambivalent than often claimed

this new volume explores the surprisingly intense and complex relationships between east and west during the middle ages and the early modern world combining a large number of critical studies representing such diverse fields as literary german french italian english spanish and arabic and other subdisciplines of history religion anthropology and linguistics the differences between islam and christianity erected strong barriers separating two global cultures but as this volume indicates despite many attempts to other the opposing side the premodern world experienced an astonishing degree of contacts meetings exchanges and influences scientists travelers authors medical researchers chroniclers diplomats and merchants criss crossed the east and the west or studied the sources produced by the other culture for many different reasons as much as the theoretical concept of orientalism has been useful in sensitizing us to the fundamental tensions and conflicts separating both worlds at least since the eighteenth century the premodern world did not quite yet operate in such an ideological framework even though the crusades had violently pitted christians against muslims there were countless contacts and a palpitable curiosity on both sides both before during and after those religious warfares

through an unprecedented multidisciplinary and global approach this book documents the dramatic several thousand year history of leprosy using bioarchaeological clinical and historical information from a wide variety of contexts dispelling many long standing myths about the disease drawing on her 30 years of research on the infection charlotte roberts begins by outlining its bacterial causes how it spreads and how it affects the body she then considers its diagnosis and treatment both historically and in the present she also looks at the methods and tools used by paleopathologists to identify signs of leprosy in

skeletons examining evidence in human remains from many countries particularly in europe and including britain hungary and sweden roberts demonstrates that those affected were usually buried in the same cemeteries as others in their communities contrary to the popular belief that they were all ostracized or isolated from society into leprosy hospitals other myths addressed by roberts include the assumptions that leprosy can't be cured that leprosy is no longer a problem today and that what is called leprosy in the bible is the same illness as the disease with that name now roberts concludes by projecting the future of leprosy arguing that researchers need to study the disease through an ethically grounded evolutionary perspective importantly she advises against use of the word leper to avoid perpetuating stigma today surrounding people with the infection and resulting disabilities leprosy will stand as the authoritative source on the subject for years to come a volume in the series bioarchaeological interpretations of the human past local regional and global perspectives edited by clark spencer larsen

crusades covers seven hundred years from the first crusade 1095-1102 to the fall of malta 1798 and draws together scholars working on theatres of war their home fronts and settlements from the baltic to africa and from spain to the near east and on theology law literature art numismatics and economic social political and military history routledge publishes this journal for the society for the study of the crusades and the latin east particular attention is given to the publication of historical sources in all relevant languages narrative homiletic and documentary in trustworthy editions but studies and interpretative essays are welcomed too crusades also incorporates the society's bulletin

the formation of the yen bloc did not result in the economic and monetary integration of east asian economies rather it led to the increasing disintegration of east asian economies compared to japan asian regions and countries had to suffer from higher inflation in fact the farther the countries were away from japan the more their central banks had to print money and the higher their inflation was moreover the income gap between japan and other asian countries widened this means that the regionalization centered on the japanese yen was destined to fail suggesting that the co-prosperity area was nothing but a strategy of regional dominance not of regional cooperation the impact was quite long lasting and it still haunts east asian countries contributing to the nourishment of their distrust vis-à-vis japan and throws a shadow on recent monetary and financial cooperation movements in east asia this experience highlights the importance of responsible actions on the part of leading countries to boost regional solidarity and cohesion for the viability and sustainability of a regional monetary system

the crusader states and their neighbours explores the military history of the medieval near east piecing together the fault lines of conflict which entangled this much contested region this was an area where ethnic religious dynastic and commercial interests collided and the causes of war could be numerous conflicts persisted for decades and were fought out between many groups including kurds turks armenians arabs and the crusaders themselves nicholas morton recreates this world exploring how each faction sought to advance its own interests by any means possible adapting its warcraft to better respond

to the threats posed by their rivals strategies and tactics employed by the pastoral societies of the central asian steppe were pitted against the armies of the agricultural societies of western christendom byzantium and the islamic world galvanising commanders to adapt their practices in response to their foes today we are generally encouraged to think of this era as a time of religious conflict and yet this vastly over simplifies a complex region where violence could take place for many reasons and peoples of different faiths could easily find themselves fighting side by side
