it's fairly obvious that one can't be a perfect environmentalist but that's okay perfection isn't the goal a good life is and

a good life has as much to do with your intent as with the end result from the introduction the newman s own organics guide to a good life is the essential book for those of us who can t live in an organic hemp tepee but do care about our quality of life global warming clean water and disappearing resources nell newman shows you how to do what is within easy reach along with realistic practical advice she shows how and why living a more environmentally conscious life benefits you and your immediate surroundings in addition to recycling and reusing the book covers consumer related steps such as how buying and eating organic food supports small farms and tastes better too how you can buy clean power through your regular power company which long distance telephone companies offer competitive pricing and service while returning a portion of their profits to environmental and educational organizations where to buy everything from pots and pans to pet food so that you can vote with your dollar and feel good about your purchases packed with profiles of fascinating and sometimes zany people and a heavy dose of sanity this book is organized according to the way you really live making it easy to identify what areas of change are viable for you a resource directory of publications retailers groups and associations is included in the back of the book

are you concerned about the state of our planet and hope that governments and corporations will find a sustainable way for us to live if you do not think about it too hard that may work but will it left on their own with drivers of popularity and profits i am not too convinced that it will the missing part of this equation is you and me individuals who believe that corporations and governments can do better individuals who believe that through action we can buy a bit more time to develop and implement solutions to our critical issues did i hear a groan out there when you read the word actions do not worry most of the actions that i am referring to will not only help save the planet but will benefit you right away through saving money time better health and having a happier life in general sustainability goes beyond controlling our consumption and pollution there are key social political and economic areas that need to be addressed as well and there are several steps that individuals can take to help in these areas for those of you who feel we could do more this book is for you and is loaded with actionable activities the reasons for doing them and explores why we are not doing them already every journey starts with a first step hopefully this book will lead to those first sustainable steps and that will change the world

residential buildings have continuously improved in energy efficiency partly as a consequence of the introduction of energy regulations in many countries although better thermal properties and systems efficiency have lowered energy consumption for space heating in recent decades substantial differences in energy consumption in similar dwellings are still being observed these differences in consumption are thought to be caused by differences in occupancy patterns by quality of construction and by rebound effects this research addresses the effect of energy performance

regulations and occupant behaviour on energy consumption for space and water heating in dwellings built after the introduction of the energy performance regulations in the netherlands the results of this research show that improving the energy efficiency of buildings alone is not enough to decrease that energy consumption
