combining research approaches from biology philosophy and linguistics the field of biosemiotics proposes that animals plants and single cells all engage in semiosis the conversion of objective signals into conventional signs this has important implications and applications for issues ranging from natural selection to animal behavior and human psychology leaving biosemiotics at the cutting edge of the research on the fundamentals of life drawing on an international expertise the book details the history and study of biosemiotics and provides a state of the art summary of the current work in this new field and

with relevance to a wide range of disciplines from linguistics and semiotics to evolutionary phenomena and the philosophy of biology the book provides an important text for both students and established researchers while marking a vital step in the evolution of a new biological paradigm

this volume provides an overview of contemporary italian philosophy from the perspective of animality its rationale rests on two main premises the great topicality of both italian contemporary philosophy the so called italian theory and of the animal question the so called animal turn in the humanities and the social sciences in the contemporary philosophical panorama the volume not only intersects these two axes illuminating italian theory through the animal question but also proposes an original thesis that the animal question is a central and founding issue of contemporary italian philosophy it combines historical descriptive chapters with analyses of the theme in several philosophical branches such as biopolitics posthumanism marxism feminism antispeciesism and theology and with original contributions by renowned authors of contemporary italian animal philosophy the volume is both historical descriptive and speculative and is intended for a broad academic audience embracing both italian studies and animal studies at all levels

is an image merely an inferior copy of the actual thing is imagination simply an escape from reality in both cases alfredo ferrarin thinks not and breaking classical assumptions that images are exclusively reproductions and imagination is a secondary faculty this book provides a rich account of what images really are and what imagination can do ferrarin begins by examining and disputing several commonplaces on images and imagination both in everyday language and in many traditional philosophical approaches with a lightness of touch throughout he brings a broad range of thinkers into dialogue from aristotle kant and freud to husserl wittgenstein sartre he then proceeds to examine the twofold nature of every image the image itself and what it is an image of before distinguishing between natural artificial mental and memory images the final chapters probe the cognitive functions of imagination the notions of fiction play and literary creation and imagination in relation to praxis and the social world comparing and relating how we conceptualize imagination to how we think about the concept of reality ferrarin contends that whilst it can be imagination is not always a flight from reality it is also a way of

figuring out what is real
