in this book jonathan h turner combines sociology evolutionary biology cladistic analysis from biology and comparative neuroanatomy to examine human nature as inherited from common ancestors shared by humans and present day great apes selection pressures altered this inherited legacy for the ancestors of humans termed hominins for being bipedal and forced greater organization than extant great apes when the hominins moved into open country terrestrial habitats the effects of these selection pressures increased hominin ancestors emotional capacities through greater social and group orientation this shift in turn enabled further selection for a larger brain articulated speech and culture along the human line turner elaborates human nature as a series of overlapping complexes that are the outcome of the inherited legacy of great apes being fed through the transforming effects of a larger brain speech and culture these complexes he shows can be understood as the cognitive complex the psychological complex the emotions complex the interaction complex and the community complex

since the appearance of homo sapiens on the planet hundreds of thousands of years ago human beings have sought to exploit their environments extracting as many resources as their

technological ingenuity has allowed as technologies have advanced in recent centuries that impulse has remained largely unchecked exponentially accelerating the human impact on the environment humans versus nature tells a history of the global environment from the stone age to the present emphasizing the adversarial relationship between the human and natural worlds nature is cast as an active protagonist rather than a mere backdrop or victim of human malfeasance daniel r headrick shows how environmental changes epidemics climate shocks and volcanic eruptions have molded human societies and cultures sometimes overwhelming them at the same time he traces the history of anthropogenic changes in the environment species extinctions global warming deforestation and resource depletion back to the age of hunters and gatherers and the first farmers and herders he shows how human interventions such as irrigation systems over fishing and the industrial revolution have in turn harmed the very societies that initiated them throughout headrick examines how human driven environmental changes are interwoven with larger global systems dramatically reshaping the complex relationship between people and the natural world in doing so he roots the current environmental crisis in the deep past
