the volume is of greatest interest to those pursuing issues of the implementation of economics education and its impact at an elementary level on economic understanding and attitudes through generally careful statistical analysis it shows what can be done even in a most difficult environment as well as the constraints on

change imposed by soviet legacies it is a valuable addition to the literature on economics pedagogy richard e ericson slavic review this comprehensive and impressive volume presents the first book length multi country investigation of reform of economic education in transition economies authors from the west and from transition economies describe the major changes in economics content and instruction that occurred in schools and universities throughout nations in eastern and central europe and the former soviet union from 1989 to 2000

suggests guidelines by which developing countries can successfully manage the rapid surge in government revenues that occurs during a commodity boom the book addresses the problems associated with such booms including long term spending commitments dutch disease and a slowdown in diversification

the economics of project analysis a practitioner s guide is written for project practitioners for instructors in agricultural project economic analysis and for students of that subject this guide extends and complements the discussion of project and policy economics contained in the second edition of economic analysis of agricultural projects by j price gittinger referred to throughout this volume as gittinger 1982 isbn10 0 8213 1751 2 isbn13 978 0 8213 1751 8

this book proposes a new methodology for the selection of one model from among a set of alternative econometric models let us recall that a model is an abstract representation of reality which brings out what is relevant to a particular economic issue an econometric model is also an analytical characterization of the joint probability distribution of some random variables of interest which yields some information on how the actual economy works this information will be useful only if it is accurate and precise that is the information must be far from ambiguous and close to what we observe in the real world thus model selection should be performed on the basis of statistics which summarize the degree of accuracy and precision of each model a model is accurate if it predicts right it is precise if it produces tight confidence intervals a first general approach to model selection includes those procedures based on both characteristics precision and accuracy a particularly interesting example of this approach is that of hildebrand laing and rosenthal 1980 see also hendry and richard 1982 a second general approach includes those procedures that use only one of the two dimensions to discriminate among models in general most of the tests we are going to examine correspond to this category

sustainable development is a concept that is receiving increasing attention from world decision makers this timely volume contains a selection of both the seminal papers and a cross section of current thinking it will be invaluable to researchers students and practitioners interested in this important topic part i presents early articles linking the macroeconomy with the environment part ii contains general surveys of the relationship between economic growth and environmental degradation included in part iii are papers with mathematical models seeking to incorporate environmental variables into macroeconomic frameworks part iv

focuses on the linkages between international trade and the environment the final section examines progress on the greening of the system of national accounts an important prerequisite for environmental macroeconomic policy making

this case study explores the complexity of developing policy options for agricultural pricing it also compares the relative success that four countries in eastern africa have had in ironing out incompatible elements in policy proposals the study guides the reader through a policymaking simulation agricultural pricing policy may arise from a number of objectives such as efficient economic development an equitable distribution of income or nutritional well being such objectives can be pursued by various means some of which may conflict with other objectives or other parts of the same plan this volume demonstrates how small group decisionmaking can help in analyzing proposals before implementation in order to avoid working at cross purposes these materials provide the historical and theoretical context for examination of policies in kenya malawi tanzania and zambia major decisions made by the countries between 1965 and 1985 are examined and compared these countries lend themselves particularly well to this type of analysis because of the similarity of their economic and institutional structures and their different experiences with agricultural development

with contributions from leading international academics this handbook covers systems of economic organization systems of economic thought business enterprise industrial organization economic institutions and notable economists
