ability to reason and to consciously choose what to do is caused by a series of illusions that scientists are only just beginning to

understand the discovery of these illusions will change the way we see ourselves more than the discoveries of darwin and copernicus
unthink explores the unconscious decisions we make and covers a variety of topics ranging from how we choose politicians and romantic partners to more abstract subjects such as whether we can consciously decide to move our fingers the counter intuitive observations that chris makes in the book include if you want someone to fancy you wear red and meet them somewhere frightening when waitresses repeat customers orders back to them instead of just saying yes they receive bigger tips to reduce your shopping bill start at the beer and snacks end of the store and work backwards if you sit someone in an upright chair when you give them good news they will be prouder of their achievements having a picture of your family on your desk might make you work harder but you ll be rattier when you get home chris paley shows us how we can understand ourselves and others better by having a greater understanding of the way that the unconscious mind has an impact of the way we live our lives

many otherwise enlightened people often dismiss etiquette as a trivial subject or worse yet as nothing but a disguise for moral hypocrisy or unjust social hierarchies such sentiments either mistakenly assume that most manners merely frame the real issues of any interpersonal exchange or are the ugly vestiges of outdated unfair social arrangements but in on manners karen stohr turns the tables on these easy prejudices demonstrating that the scope of manners is much broader than most people realize and that manners lead directly to the roots of enduring ethical questions stohr suggests that though manners are mostly conventional they are nevertheless authoritative insofar as they are a primary means by which we express moral attitudes and commitments and carry out important moral

goals drawing primarily on aristotle and kant and with references to a wide range of cultural examples from jane austen s pride and prejudice to larry david s curb your enthusiasm the author ultimately concludes that good manners are essential to moral character

the suicidal proclivity of our time writes the acclaimed philosopher j budziszewski is to deny the obvious our hearts are riddled with desires that oppose their deepest longings because we demand to have happiness on terms that make happiness impossible why and what can we do about it budziszewski addresses these vital questions in his brilliantly persuasive new book the line through the heart the answers can be discovered in an exploration of natural law a venture that with budziszewski as our expert guide takes us through politics religion ethics law philosophy and more natural law the author states plainly but provocatively is a fact about human beings as surely as we have hands and feet we have the foundational principles of good and evil woven into the fabric of our minds from this elemental fact emerges a natural law theory that unfolds as part of a careful study of the human person thus budziszewski shows natural law forms a common ground for humanity but this common ground is slippery while natural law is truly an observable part of human nature human beings are hell bent quite literally on ignoring it the mere mention of the obligations imposed on man by his nature will send him into a rage in this sense the line through the heart explores natural law as not simply a fact and a theory but also a sign of contradiction while investigating the natural law and its implications budziszewski boldly confronts and offers a newly integrated view of a wide range of contemporary issues including abortion evolution euthanasia capital punishment the courts and the ersatz state religion being built in the name of religious toleration written in budziszewski s usual crystalline style the line through the heart makes clear that natural law is a matter of concern not merely to scholars it touches how each of us lives and how all of us live together his profoundly important examination of this subject helps us make sense of why habits that run against our nature have become second nature and why our world seems to be going mad

when i was young i was mysteriously protected and kept from harm i was hit by a car severely burned on the palms of my hands and literally thrown out of a car into a busy intersection somehow i never sustained any injuries i had many questions as this divine protection and provision continued throughout my life little did i know that what i endured was part of a plan for me to know what i have now learned and share this with all who will listen these adventures with our heavenly father not only gave me answers to my questions

but also much understanding of our father and his works this book tells about my adventures and part of what i learned it is the beginning of a series of books containing what our father has taught me it was not easy for me to hear it was not easy for me to write it is always difficult for us to listen to him all he is asking now is for us to listen to what he has told us from the beginning and respond

this book explores the truth behind our beliefs in god and the propensity of human beings to be religious in an honest attempt to seek the answers to life s deepest questions the author probes into how life began it then progresses to investigate the nature of religions and writes that because we refuse to accept our mortality we delude ourselves and we coerce others with the tyranny of our own beliefs
