grennan bases his evaluation of arguments on two criteria logical adequacy and pragmatic adequacy he asserts that the common formal logic systems while logically sound are not very useful for evaluating everyday inferences which are almost all deductively invalid as stated turning to informal logic he points out that while more recent informal logic and critical thinking texts are superior in that their authors recognize the need to evaluate everyday arguments inductively they typically cover only inductive fallacies ignoring the inductively sound patterns frequently used in successful persuasion to redress these problems grennan introduces a variety of additional inductive patterns concluding that informal logic texts do not encourage precision in evaluating arguments grennan proposes a new argument evaluation procedure that expresses judgments of inferential strength in terms of probabilities based on theories of stephen toulmin roderick chisholm and john pollock his proposed system allows for a more precise judgment of the persuasive force of arguments

what are the elements of expression what are the origins aims and functions of expression an adequate theory of expression can help us to address these questions and to recognize the diversity of the many modes of expression scientific ethical aesthetic religious and sociocultural alex scott describes the interdependence of the modes of expression showing that a theory of expression can promote social understanding by illuminating the nature of our interdependence as individuals in society expression theory as described by scott is not merely a theory of art it is a theory of the ethics aesthetics psychology logic language and politics of expression it is a theory that enables us to examine in a more comprehensive way the question of whether there are any logical limits to the expressive capacity of language expression theory is also a theory that enables us to transcend the dialectics of the said and the unsaid the sayable and the unsayable it enables us to address the question of whether the communicability of a person's thoughts or feelings is determined solely by that person's communicative competence or whether there are some kinds of thoughts and feelings that are truly ineffable and incommunicable

randy ramal argues that philosophy s main responsibility lies in providing intelligibility to the ordinary language of everyday life while dispelling unwarranted skepticism philosophers need to go the hard way to fulfill this responsibility because of the constant and dangerous temptation to turn philosophy into a normative discipline rather than keep it as a descriptively hermeneutical enterprise in on philosophy intelligibility and the ordinary going the bloody hard way the philosophy of alfred north whitehead is central to ramal s endeavor to demonstrate the need to separate the hermeneutical responsibility of philosophy from the normative aspects of responsibility while showing the futility of labeling whitehead as a purely disinterested philosopher who abandons the idea that ordinariness is relevant to good philosophical thinking ramal frames this discussion within a larger in depth engagement with a vast number of thinkers philosophers and literary figures whose works touch on the question of the ordinary
