this landmark book is the result of interviews with many of the greatest names in ferrari history and is loaded with never before seen stories and photos

presents eleven chapters and six special features that cover basic through intermediate computer concepts with an emphasis on the personal computer and its practical use including hardware software application and system software the internet and world wide communications e commerce and computers in society

probes developments and trends in research and clinical applications of vitamin e discussing its chemistry and biochemistry and natural occurrence in nuts seeds whole grains and vegetable and fish liver oils the book covers new findings on the role of vitamin e as a biological response modifier

the proliferation of economic agents with market power especially those operating in the digital economy and which add unprecedented dynamic and complexity to it has sparked heated discussions among academics professionals and competition authorities around the world regarding the effects of their actions on the market and consumers unlike classic cartels a conduct that has been treated as per se unlawful in brazil regardless of the production of effects under brazilian competition law unilateral conduct falls into a gray area encompassing different practices with different effects on the market in this sense examples of unilateral conduct that may be considered anticompetitive are numerous both under old and new labels predatory pricing abusive pricing resale price maintenance imposition of exclusivities parity clauses price discrimination discrimination of commercial conditions self preferencing price squeeze refusal to deal among others the competition analysis of such conduct which may occur in traditional brick and mortar markets as well as in digital environments involving various platforms and arrangements like blockchain for the purpose of a decision by the authority on whether they constitute anticompetitive practices or not involves a highly complex analysis of various factors the analysis must consider the presence of dominant positions real or potential detrimental effects on competition efficiencies justifications

economic rationale for the conduct and for some schools of thought a weighing of anticompetitive effects and efficiencies due to the complexity specificities and dynamism of unilateral practices especially in digital markets or hybrid digital platforms there is a question of whether the instruments currently available to competition authorities are sufficient to understand and rule on such practices in this regard the analysis of various cases in relatively recent jurisprudence shows a pursuit for new forms of interpretation and application and even updates to the methodologies of analysis and of applicable legislation in order to strike a balance between intervention to curb anticompetitive practices to the extent necessary for protecting competition without resulting on undue interference in the involved markets or on disincentives to innovation historically discussions about exclusivity clauses and resale price maintenance have been central in this type of investigation but digital platforms are effectively changing this landscape giving rise to discussions on new types of conduct or more sophisticated forms of implementing traditional types of conduct which have become possible or potentially more serious through new technologies the broad reach of platforms the collection of massive data and the international nature of the largest players in these markets notions of relevant market theories of harm and standards of consumer welfare or protection traditionally adopted by antitrust authorities are under study and may be revised the heterogeneity of legal systems in different jurisdictions is another complicating factor for national authorities in the analysis of conduct practiced by companies with market power internationally all these analyses are present in the 25 articles written for this publication by ibrac we have articles focused on traditional methods of analysis in traditional markets as well as articles addressing new trends and recent discussions in digital markets and platforms in times of pandemic and economic crisis as expected approaches to prices and pricing strategies are recurring themes in the works compiled here
