issues in e u and u s foreign policy edited by münevver cebeci aims at analyzing the perceptions interests and policies of the eu and the us on various international issues it

portrays their convergences and divergences and reflects on their interplay the book has a geographical focus rather than a thematic one however some themes such as weapons of mass destruction dual use technology transfer energy security and democratization are unavoidable within their respective geographical contexts for example the authors inquire into the case of iran with a special focus on nuclear proliferation they investigate russia with a significant emphasis on energy security iraq is examined with a discussion on the withdrawal of occupation troops and finally the authors address the case of china with a debate on dual use technology transfer issues in european union and u s foreign policy is composed of two parts the first involves an inventive theoretical framework for understanding eu and us foreign policy the analysis extends beyond traditional approaches that seek to explain us and eu foreign policy through various dichotomies such as soft power versus hard power without overlooking the significance of such dichotomies this section further discusses how european and american scholars approach transatlantic relations in different ways the second section covers an intensive comparative analysis of eu and us foreign policy on specific issue areas some chapters also deal with the impact of their policy divergences and convergences on transatlantic relations and nato nevertheless the book aims to go beyond the parochial debates of burden sharing or division of labor in transatlantic relations it focuses on and actually proposes a broader framework of cooperation and coordination for the eu and the us

the importance of the daily experience of new information and communication technologies is highlighted by this timely volume the book is based on work carried out in the european media technology and everyday life network and is structured round a series of seven empirical case studies drawn from research within europe the application of this perspective draws attention not just to the significance of information and communication technologies for a mature understanding of the conduct of everyday life in contemporary europe but also for the significance of that understanding for the development of communication and information policy the research makes a significant contribution to our understanding of the dynamics and evolution of a core dimension of european society as well as informing on going and important debates on the nature of the relationship between the social and the technological in the information and communication arena

handbook on the toxicology of metals fifth edition volume i general considerations is the first volume of a two volume work that gives an overview and covers topics of general importance including reviews of various health effects of trace metals the book emphasizes

toxic effects in humans along with discussions on the toxic effects of animals and biological systems in vitro when relevant the book has been systematically updated with the latest studies and advances in technology and contains several new chapters as a multidisciplinary resource that integrates both human and environmental toxicology the book is a comprehensive and valuable reference for toxicologists physicians pharmacologists and environmental scientists in the fields of environmental occupational and public health contains peer reviewed chapters that deal with the effects of metallic elements and their compounds on biological systems includes information on sources transport and the transformation of metals in the environment covers the ecological effects of metals to provide a basis for better understanding of the potential for adverse effects on human health provides critical information on the properties use biological monitoring dose response relationships diagnosis treatment and prevention of metallic elements and compounds

this text is a comparative study of european related news discourses of two countries of the european union britain and italy the central hypothesis of the study is that specific historical cultural and political factors are powerful determinants of the differences in commitment toward the european project of both news media and political cultures and have led to different formulations of europe the book argues that the italian nation state and national identities are inclusive at some levels of a european identity whereas the british state and national identities are on the whole exclusive of a european identity this underlies the predominant negativity of british media news discourses on the question of europe and the european community in particular

this book presents the latest information on the genetics and genomics of the globe artichoke it focuses on the latest findings tools and strategies employed in genome sequencing physical map development and qtl analyses as well as genomic resources the re sequencing of four globe artichoke genotypes representative of the core varietal types in cultivation as well as the genotype of cultivated cardoon has recently been completed here the five genomes are reconstructed at the chromosome scale and annotated moreover functional snp analyses highlight numerous genetic variants which represent key tools for dissecting the path from sequence variation to phenotype as well as for designing effective diagnostic markers the wealth of information provided here offers a valuable asset for scientists plant breeders and students alike
