this paper explores the strengths and weaknesses of inter firm networks as a public policy resource that has necessarily required experimentation and adaptation the focus of the paper

is an evaluation of public policy network initiatives in the united kingdom from the point of view of the companies participating in these initiatives the study finds that inter firm network initiatives have faced a number of problems resulting in the level of inter firm interaction being generally fairly low and unintensive this has severely limited the number of firms that have benefited from participation as well as the overall impact on firm performance and growth more positively it is shown that the initiatives have resulted in substantial gains for albeit a small number of participating companies the small number of companies achieving substantial benefits were most often those involved in initiatives that were able to formalise sustainable networks the key policy problem is that this situation has occurred in only a very restricted number of circumstances with formal network initiatives being subject to extremely high drop out rates it is suggested that policies aimed at formal network initiatives should be abandoned as a mechanism for creating a critical mass of sustainable networks instead the progression of policy models based on informal initiatives appears to offer the most plausible means of catalysing inter company contact

this book examines the inter firm networks created by interlock coordination through shared directors inter board and managers inter department at various levels whole aggregate core vs peripheral companies and distribution by country and sector presenting an empirical case study on all the limited liability or stock companies of the aerospace industry in the european union and its interlock partners worldwide the authors shed new light on these forms of coordination moreover they reveal the relevance of shared managers coordination and hybrid manager director interlocks the book applies advanced statistical and social network analysis alike by combining firms attributes e g standard economic financial parameters and topological indices for firms e g centrality and cluster measures by conducting the analysis at both the aggregate network level and the cluster or corporate group level the authors show how extensive and intensive the interlock forms of coordination are especially when dealing with shared managers by testing seven hypotheses concerning the research stream on board interlocks and more broadly inter firm networks the study offers new insights into the role of the financial sector on the relations between interlock coordination and firms performance on the role of geographical technological and organizational proximity and on the relations between interlock coordination and firms size as such this book will appeal to scholars of organization studies business and management studies industrial and evolutionary economics and economic sociology as well as officers and policymakers at anti trust regulation institutions

this book focuses especially on financial and or managerial

accounting aspects of inter firm network in three phases 1 strategy for forming the inter firm network 2 management control of inter firm network and 3 task control of production sales and logistics of inter firm network

this well edited volume should be on the shelf of every regional development agency library its seventeen chapters written by 31 predominantly academic contributors are divided into four coherent sections the first on cluster and network modelling the next on empirical analysis a third on case studies finishing with two chapters on policy analysis and strategies tony jackson journal of economic development this book provides a state of the art overview of spatial industrial clusters and inter firm networks given the prevailing political belief that clusters can be a major vehicle for economic development and growth it is important to have a sound understanding of clusters and how they emerge grow eventually stagnate and disappear it is also vital to know when and how to apply policy measures to support cluster development in order to increase economic welfare this book illuminates both the theoretical and empirical issues relating to clusters and inter firm networks and presents a number of interesting case studies from a variety of different countries

inter firm relations are not new but fast developments in technology and globalization have led to increased opportunities for international alliances and an upsurge in the interest in inter organizational relations with the time ripe for a unified theory of collaboration inter firm collaboration learning and networks surveys the current field connects differing perspectives and answers questions about who should collaborate why and how emphasizing learning and innovation this book offers an integrated account of the key issues in the design and management of inter firm relations and networks it takes a uniquely interdisciplinary approach bringing together perspectives from economics sociology and management to offer a new kind of book on this subject supporting theory the book includes illustrative case examples taken from a variety of firm network and industry types coherent and wide reaching inter firm collaboration learning and networks provides students and academics in economics business sociology social psychology and economic geography with the tools required to understand this topical and highly relevant subject

this volume explores the dynamics of interorganizational ventures focusing on understanding their forms and enhancing effectiveness it emphasizes working across organizational interfaces to create interorganizational learning and performance consultants and researchers aim to build networks for collaborative problem solving

the leveraging of inter firm networks is increasingly considered

to be a strategic resource that can potentially be shaped by managerial action in recent years scholars have turned to the concept of social capital to understand how the transfer of knowledge occurs within and across firms however this has resulted in an overstretching of the social capital concept the aim of this paper is to refine and add specificity to the current broad application of the social capital concept it is argued that although the social capital concept explains investments in networks based on a network logic relating to sociability and socialization it does not explain investments in networks based on a logic relating to economic expectations these expectations result in network participation that is more calculative than networks containing social capital the paper introduces the notion of network capital to explain the resources contained within inter firm networks that do not necessarily equate with the type of trust and obligations associated with social capital network capital is defined as an investment in calculative relations through which firms gain access to knowledge to enhance expected economic returns it is argued that while network capital can be strategically managed particularly to influence knowledge flow the nature of social capital is such that it is very difficult to manage it is concluded that the network capital social capital framework opens a number of avenues in terms of future research especially in relation to the extended resource based view of the firm and theories of open innovation

interfirm networks include franchising retail and service chains cooperatives financial networks joint ventures strategic alliances licensing public private partnerships and new network forms in the digital economy this book gathers the latest research studies that approach these networks and the creation of innovation under the conditions of a complex dynamic knowledge intensive and digital economy from an interdisciplinary perspective the studies all of which were written by respected experts explore how firms can improve their competitiveness by securing access to innovation knowledge complementary resources and capabilities otherwise not available to them in addition they highlight how driven by an unpredictable environment firms embedded in inter organizational networks are increasingly transforming from co operators to collaborators and valuable co creators of innovation

the objective of this paper is to analyse the characteristics and nature of the networks that firms utilize to access knowledge and facilitate innovation the paper draws on the notion of network resources distinguishing two types social capital consisting of the social relations and networks held by individuals and network capital consisting of the strategic and calculative relations and networks held by firms the methodological approach consists of a quantitative analysis of

data from a survey of firms operating in knowledge intensive sectors of activity the key findings include social capital investment is more prevalent among firms frequently interacting with actors from within their own region social capital investment is related to the size of firms firm size plays a role in knowledge network patterns and network dynamism is an important source of innovation overall firms investing more in the development of their inter firm and other external knowledge networks enjoy higher levels of innovation it is suggested that an over reliance on social capital forms of network resource investment may hinder the capability of firms to manage their knowledge networks it is concluded that the link between a dynamic inter firm network environment and innovation provides an alternative thesis to that advocating the advantage of network stability

this insightful book presents a legal and economic analysis of inter firm cooperation through networks as an alternative to vertical integration it examines comparatively various forms of collaboration ranging from consortia to multiparty joint ventures and from franchising to dealerships collaboration among firms of different sizes helps to overcome numerousweaknesses of the modern western industrial systems it permits the governing of vertical disintegration without increasing fragmentation and transaction costs and allows firms to benefit from resource complementarities favoring division of labour the contributing authors primarily focusing on europe and the us address important ways in which legal systems provide a framework for inter firm coordination it is clear from the analysis that significant obstacles to collaboration still remain and the authors call for legal reforms at european and member states level

using a sample of listed firms in india the study finds that the inter firm network on account of director interlocks is a small world and the network has become more integrated since the introduction of corporate governance regulations in the country firm level analysis finds a negative relation between average path length and probability of acquiring indicating the importance of faster reach of information among the firms within the network it also finds a non linear relation given by inverted u shaped curve between firm level clustering and probability of acquiring initially increase in clustering has a positive effect through the informational quality effect however at higher levels the negative informational redundancy effect dominates leading to a curvilinear relation

collaboration of organizations reshapes traditional managerial practices and creates new inter organizational contexts for strategy coordination and control information and knowledge management heralded as organizational forms of the future

networks are at the same time fragile and precarious organizational arrangements which regularly fail in order to investigate the new realities created by technology enabled forms of network organizations and to address the emerging managerial challenges this book introduces an integrative view on inter firm network management centred on a network life cycle perspective strategic economic and relational facets of business networking are explored the network management framework is illustrated onto a broad range of european inter firm network examples in various industries rendering insights for new management practices

this title was first published in 2000 the first book which brings together and interprets both the theoretical concepts associated with the study of networks in the business world and the policy applications being applied to the practical building and development of such networks it maps the changes in the culture of economic development policy that occurred in the uk during the 1990s incorporating a detailed assessment of the contribution that the training and enterprise councils made to business support policies the book is published at a time when network and cluster building has risen to the top of economic development agendas not only in uk but in many countries throughout the world it offers the most detailed insight so far available into the structure motivations and processes involved in developing business networks through institutional intervention the book is relevant to anyone with an interest in business policy and theory

collaboration for innovation through the distant search for knowledge presents unique challenges from partnering for resources firms through their exploratory learning are incorporating informal knowledge flows in order to retain the organizational capability to respond to environmental uncertainties this quantitative correlational study examined the mediating role of social capital in the inter firm network on the adoption of innovative technologies required to exploit oil and gas resources efficiently the empirical study integrated a conceptual model that comprised the knowledge based view alliance and social network theories the impact of informal knowledge networks in collaborative organizations was observed to be positive and was moderated by the specific partner firm attributes support for establishing professional communities cuts across international oil companies iocs national oil companies nocs and service oil companies socs that frequently deploy beneficial oilfield technologies to enhance competitive advantage the managerial implication is the premiums required to form and break established network ties when aligning the organization
