this volume contains the scientific contributions presented at the international symposium held in naples italy in november 1992 at the national tumor institute fondazione pascale the meeting gathered together experts from different

disciplines all involved in the vital and timely subject of nutrition and cancer about 15 years ago a consensus among cancer epidemiologists began to emerge suggesting that diet might be responsible for 30 60 of the cancers in the developed world the best estimate reported in a now classical paper by richard doll and richard peto 1981 was that by dietary modification it would be possible to reduce fatal cancers by about 35 within about six years there was widespread agreement that the principal changes required were a reduction in consumption of fat along with an increase in the consumption of fruit green and yellow vegetables dietary fiber and some micronutrients attention was also paid to the methods of cooking and preservation of foodstuffs on the other hand very few if any effects were attributed to food additives and to pollution of food by trace pesticides to which the general public often gives unfounded importance

i tumori maligni della testa e collo insorgono in sedi di grande complessità anatomica e funzionale proprio per questo rappresentano una sfida per tutti coloro che se ne occupano stili di vita che non prevedano l'uso di tabacco e l'abuso di alcolici potranno limitarne l'incidenza così come la vaccinazione contro il papilloma virus responsabile dell'insorgenza di tumori nell'orofaringe il fine di ottenere una ottimale possibilità di guarigione con la massima conservazione delle funzioni specifiche dell'organo è stato raggiunto nei tumori in stadio limitato mentre nei tumori localmente avanzati questo è un punto ancora da raggiungere novità nella diagnostica per immagini la radioterapia la chirurgia i nuovi farmaci sono disponibili oggi per migliorare le possibilità di cura ma è soprattutto la multidisciplinarietà nella decisione clinica l'accuratezza della programmazione terapeutica l'efficacia nel controllo delle cure che possono offrire al paziente una vita migliore

una nuova concezione di ciò che si intende per alimentazione naturale particolarmente per le donne in stato interessante non rinunce finì a se stesse ma riscoperta della parte viva degli alimenti senza demonizzazioni o pregiudizi si propongono quindi esempi di menù adatti alle trasformazioni fisiologiche della gravidanza e all'aumentato fabbisogno calorico con attenzione al gusto e al sapore degli alimenti
