the papers in this collection share a common interest in the empirical theoretical and meta theoretical aspects of the internal external formal functional debate in linguistic theory the primary aim of this volume is to initiate cooperation between internationally renowned generative and variationist linguists with a view to developing an innovative and more cohesive approach to syntactic variation the present volume contains treatments incorporating the analysis of external factors into accounts focusing on the internal linguistic conditioning of syntactic variation and change cross linguistically as

such it offers novel approaches to three key areas of current linguistic debate viz 1 methodological practices 2 theoretical applications and 3 modularity the volume is therefore an important achievement for the progress of linguistic theory more generally and it is an even more crucial milestone in the coming of age of socio syntax as a discipline in its own right

microfossils are ideally suited to environmental studies because their short generation times allow them to respond rapidly to environmental change this book represents an assessment of the progress made in environmental micropalaeontology and sets out future research directions the taxa studied are mainly foraminifera but include arcellaceans diatoms dinoflagellates and ostracodes the papers themselves range from reviews of applications of particular taxa to specific case studies
