high dimensional integration arises naturally in two major sub fields of statistics multivariate and bayesian statistics indeed the most common measures of central tendency variation and loss are defined by integrals over the sample space the parameter space or both recent advances in computational power have stimulated significant new advances in both bayesian and classical multivariate statistics in many statistical problems however multiple integration can be the major obstacle to solutions this volume contains the proceedings of an ams ims siam joint summer research conference on statistical multiple integration held in june 1989 at humboldt state university in arcata california the conference represents an attempt to bring together mathematicians

statisticians and computational scientists to focus on the many important problems in statistical multiple integration the papers document the state of the art in this area with respect to problems in statistics potential advances blocked by problems with multiple integration and current work directed at expanding the capability to integrate over high dimensional surfaces
