as a mature topic in chemical engineering the book provides methods problems  
and tools used in process control engineering it discusses process knowledge  
sensor system technology actuators communication technology and logistics  
design and construction of control systems and their operation the knowledge  
goes beyond the traditional process engineering field by applying the same  
principles to biomedical processes energy production and management of  
environmental issues the book explains all the determinations in the chemical  
systems or process systems starting from the beginning of the processes going  
through the intricate interdependency of the process stages analyzing the  
hardware components of a control system and ending with the design of an

appropriate control system for a process parameter or a whole process the book is first addressed to the students and graduates of the departments of chemical or process engineering second to the chemical or process engineers in all industries or research and development centers because they will notice the resemblance in approach from the system and control point of view between different fields which might seem far from each other but share the same control philosophy
