this text was written with an aim to provide the beginner with a reliable and  
understandable guide for study in the teacher's absence except where it would needlessly  
overburden the student the subject is presented in a mathematically rigorous way in spite  
of this no mathematics beyond the elementary calculus is required

the breadth of scientific and technological interests in the general topic of photochemistry

is truly enormous and includes for example such diverse areas as microelectronics atmospheric chemistry organic synthesis non conventional photoimaging photosynthesis solar energy conversion polymer technologies and spectroscopy this specialist periodical report on photochemistry aims to provide an annual review of photo induced processes that have relevance to the above wide ranging academic and commercial disciplines and interests in chemistry physics biology and technology in order to provide easy access to this vast and varied literature each volume of photochemistry comprises sections concerned with photophysical processes in condensed phases organic aspects which are sub divided by chromophore type polymer photochemistry and photochemical aspects of solar energy conversion volume 34 covers literature published from July 2001 to June 2002 specialist periodical reports provide systematic and detailed review coverage in major areas of chemical research compiled by teams of leading authorities in the relevant subject areas the series creates a unique service for the active research chemist with regular in depth accounts of progress in particular fields of chemistry subject coverage within different volumes of a given title is similar and publication is on an annual or biennial basis

encyclopedia of interfacial chemistry surface science and electrochemistry seven volume set summarizes current fundamental knowledge of interfacial chemistry bringing readers the latest developments in the field as the chemical and physical properties and processes at solid and liquid interfaces are the scientific basis of so many technologies which enhance our lives and create new opportunities its important to highlight how these technologies enable the design and optimization of functional materials for heterogeneous and electro catalysts in food production pollution control energy conversion and storage medical applications requiring biocompatibility drug delivery and more this book provides an interdisciplinary view that lies at the intersection of these fields presents fundamental knowledge of interfacial chemistry surface science and electrochemistry and provides cutting edge research from academics and practitioners across various fields and global regions
