this book examines the often tragic and nearly always disabling metaphor of the *theatrum mundi* world as stage as it plays itself out in the characters of mary shelley's novels

just over 200 years ago on a stormy night a young woman conceived of what would become one of the most iconic images of science gone wrong the story of victor frankenstein and his creature for a long period mary shelley languished in the shadow of her luminary husband percy bysshe shelley but was rescued from obscurity by the feminist scholars of the 1970s and 1980s this book offers a new perspective on shelley and on science fiction arguing that she both established a new discursive space for moral

thinking and laid the groundwork for the genre of science fiction adopting a contextual biographical approach and undertaking a close reading of the 1818 and 1831 editions of the text give readers insight into how this story synthesizes many of the concerns about new science prevalent in shelley s time using michel foucault s concept of discourse the present work argues that shelley should be not only credited with the foundation of a genre but recognized as a figure who created a new cultural space for readers to explore their fears and negotiate the moral landscape of new science

beginning with the premise that men and women of the romantic period were lively interlocutors who participated in many of the same literary traditions and experiments fellow romantics offers an inspired counterpoint to studies that emphasize differences between male and female romantic era writers linking among others charlotte smith and william wordsworth felicia hemans and percy bysshe shelley the contributors defamiliarize the work of both male and female writers by drawing our attention to frequently neglected aspects of each writer s art

this collection provides new readings of frankenstein from a myriad of established and burgeoning theoretical vantages including narrative theory cognitive and affect theory the new materialism media theory critical race theory queer and gender studies deconstruction psychoanalysis and others demonstrating how the literary power of frankenstein rests on its ability to theorize questions of mind self language matter and the socio historic that also drive these critical approaches this volume illustrates the ongoing intellectual richness found both in mary shelley s work and contemporary ways of thinking about it

forget boris karloff the real story is scarier because it examines real human desires and capabilities a brilliant student victor frankenstein comes upon the knowledge of creating life expecting glory and hoping to benefit humanity frankenstein creates a man only to discover that creation carries more consequences and responsibilities than he foresaw the resulting tragedy speaks directly to some of the issues facing us in science and medicine today setting imaginative europe 1800s

the audience remains much the same as for the 1992 handbook namely mathematics education researchers and other scholars conducting work in mathematics education this group includes college and university faculty graduate students investigators in research and development centers and staff members at federal state and local agencies that conduct and use research within the discipline of mathematics the intent of the authors of this volume is to provide useful perspectives as well as pertinent information for conducting investigations that are informed by previous work the handbook should also be

a useful textbook for graduate research seminars in addition to the audience mentioned above the present handbook contains chapters that should be relevant to four other groups teacher educators curriculum developers state and national policy makers and test developers and others involved with assessment taken as a whole the chapters reflects the mathematics education research community's willingness to accept the challenge of helping the public understand what mathematics education research is all about and what the relevance of their research findings might be for those outside their immediate community

a monster assembled by a scientist from parts of dead bodies develops a mind of his own as he learns to loathe himself and hate his creator

excerpts from criticism of the works of novelists poets playwrights short story writers and other creative writers who lived between 1800 and 1900 from the first published critical appraisals to current evaluations

frankenstein tells of the creation by victor frankenstein of a man whose terrifying aspect belies his humanity this book gives a detailed critical commentary on the novel and also puts it in its historical biographical and literary contexts

on science fiction authors
