academic paper from the year 2022 in the subject history of europe colonialism language english abstract this paper tries to show the socio economic origins of neocolonialism and the african states response since 1960 this research employs a

qualitative study based on a careful examination of books pertinent published journal articles and other works that have been consulted cross checked and reinterpreted the outcome demonstrates that since the 1960s former colonial powers have sought to maintain their former position of agricultural product and raw material attachment with newly independent african states finally some african state leaders such as nkrumah nyerere milton obote and others provided an exemplary response to the expansion of neocolonialist powers in africa by focusing on a thorough explanation of dependency theory and advising african leaders to fight neocolonialists in the economic sphere and they began cooperation by holding conferences and signing an agreement to combat neocolonialism

this book offers an extensive review of market oriented economic reforms since 1970 and considers the question of whether more liberal economic policy yields greater social welfare the author demonstrates that despite the widespread uniformity of economic policy across countries over the past 45 years welfare differences persist stankov posits that the crisis has stalled the momentum of economic freedom reforms across the globe and policy agendas have gradually shifted from pro market to pro redistribution the book argues that this shift is inevitable market oriented economics stankov notes is the natural bedfellow of populism through rigorous empirical methodology and the use of various case studies stankov is among the first to offer an empirical explanation

the bulk of contemporary economics assumes rather than explains differences between people or groups of people yet many of these differences are produced by society or they imply differing opportunities and outcomes this book argues that economists should concern themselves with the explanation of the social causes and effects of such differences d ippoliti introduces the concept of diversity to summarise all differences that are of social origin and that a theory or model seeks to explain this contrasts with the traditional concept of heterogeneity that instead refers to differences that are deemed to be exogenous of economic theory in approaching this the book ranges from the fields of methodology and history of economics to applied empirical work as well as gender diversity which is considered in depth the analysis of the thinking of two major economists of the past john stuart mill and gustav schmoller demonstrates how gender diversity exemplifies some of the fundamental issues in economics such as the division of labour society s capacity to reproduce itself and the

role of social institutions and their impact on individual and collective behaviour the book maintains that growth of gdp and of the services sector cannot be trusted to automatically bring about greater inclusion of women in the labour market active policy interventions are needed spanning from the removal of discrimination to the provision of public services and the establishment of fair competition in the market along with an improved division of social and political power between the sexes this work will be of interest to researchers and students focusing on the history of economic thought labour economics social policy and gender studies
